Continued from Page 1

Louis Elisa among the most vocal — charge that police officials fail to de-

play enough patrols to Area B. Superintendent in Chief William Bratton said the regular patrol figures, which his department provided, do not show the deployment of special units, such as the anti-gang and antidrug squads, which spend a great deal of time in high-crime areas such as Area B. Bratton said the department's resources are appropriately deployed.

The issue of police deployment has taken on added significance since the killing last week of Charleston Sarjeant at the Tasty Chicken restaurant in Uphams Corner, a neighborhood beset by drug dealing and other crimes despite police and community efforts to revitalize it.

"There is a severe imbalance," said Yancey. "I believe there should be a stronger connection between violent crime and the deployment of police."

Dorchester District Court Judge Darrell Outlaw last week called on officials to redeploy officers and supplement the force with State Police and even the National Guard.

Some criminologists question whether increased police presence alone can reduce violent crime.

Police officials say patrol units are assigned on the basis of the number and seriousness of 911 calls for service.

"I'm satisfied that, with the available resources that the department has, all areas of the city are getting their fair share based on current problems in the city," said Bratton.

Bratton added, however, that a continued erosion in the police work force by attrition could bring the patrol staff below the level of 848 officers needed to respond to calls citywide.

The chief also said a virtual elimination of overtime due to budget restraints has severely cut into the flexibility of commanders to deal with special crime problems or to fill in for vacationing officers.

Criminologists see a link between police presence and a sense of safety for community residents and entrepreneurs.

"It's really critical that Uphams Corner, Mattapan Square, all the

## Boston police and crime

Average patrol force versus violent crime

	ESTIMATED REGULAR PATROL OFFICERS PER DAY	PERCENT OF TOTAL PATROL FORCE	NUMBER OF VIOLENT CRIMES	PERCENT OF TOTAL CRIMES
District 1 (Downtown, Chinatown, East Boston, Charlestown)	50	17.0%	1,107	13.7%
District 2 (Roxbury, Mattapan, North Dorchester)	98	37.0%	3,267	40.3%
District 3 (South Boston, Dorchester)	135	29.0%	1,582	17.0%
District 4 (South End, Allston, Brighton)	51	16.7%	1,678	18.7%

not include police on a day off, or those on long- or short-term disability or light duty, those working in a nonpatrol capacity, or in any of several dozen special citywide units such as the anti-gang, anti-gang or K-9 patrols. Information on the special units' deployment was unavailable.

Moreover, Bratton said, patrol numbers vary from season to season and place to place depending on police needs and resources such as overtime.

"This is on the average what we would have out as a minimum in the various districts," Bratton said of the figures provided by the department.

Police also provided the same sort of breakdown of violent crimes — the 11,829 homicides, rapes, robberies and aggravated assaults committed in Boston last year.

In a Globe review of the information provided by the department, the percentages of police deployed in each area were compared to the percentages of violent crime in the area in 1991. (See chart above)

A spreadsheet analysis by Yancey of similar information provided to the City Council showed similar discrepancies between crime and police resources. He said that such an imbalance puts more pressure on police officers patrolling the higher-crime areas and "unnecessarily exposes law-abiding citizens to violence."

Bratton dismissed Yancey's assertion of time in spent in the high-

About eight patrol officers were added to District C-11, which includes Uphams Corner and other parts of Dorchester. Slightly more than 13 percent of the city's violent crime occurred in this district of Area C.

Moreover, District B-2 has by far the largest number of regular patrol officers, 98, compared to 56 for C-11 and 50 for A-1, which covers downtown, Chinatown, the waterfront and Beacon Hill, according to the Globe's review.

Bratton said that police staffing follows the incidence of calls, which is steady during the day, increases in

## Patrols seen out of sync with crime

By Tom Coadley  
GLOBE STAFF

In the neighborhoods of North Dorchester, Roxbury and Mattapan that make up police Area B, 40 percent of Boston's violent crimes were committed last year. But in an average 24-hour period, only 29 percent of the city's regular patrol units are assigned to that area.

amount of time is spent in the high-crime areas by police from the special citywide units who supplement the regular patrols.

Bratton also pointed out that more officers were assigned last year to high-crime areas in the city when the motorcycle patrol was disbanded.

Approximately 42 additional officers patrol in units targeted at specific areas of criminal activity in police District B-2, covering Roxbury and parts of Dorchester, where 27 percent of Boston's violent crime was committed, the most of any district.

Criminal Justice at Northeastern University.  
• Still, Fox and others questioned whether greater police presence would necessarily result in a decline in violent crime, citing the unpredictable, personal nature of many attacks.

Police officials yesterday provided a detailed breakdown of how nearly 300 patrol units are assigned to districts on an average day. About 450 officers in these units respond to emergency and other calls.

The number is significantly lower than the 1,400 patrol officers on the force because the daily figure does

About eight patrol officers were added to District C-11, which includes Uphams Corner and other parts of Dorchester. Slightly more than 13 percent of the city's violent crime occurred in this district of

the evening and night and decreases after 2 a.m.

A key task for Bratton is to improve management, training and technology in the department, paving the way for the community-based policing in which officers are to take time to communicate with neighborhood residents and defuse problems before they intensify.

The installation of a new computer system will help police better develop and analyze information on crime and call patterns to target resources more effectively, Bratton said.

While experts on crime do see a value to increased police presence, many generally discount the effectiveness of greater numbers of police alone on reducing violent crime — unless an area is saturated by police, a move most communities cannot regularly afford.

Moreover, Jack McDevitt, associate director of the Center for Applied Social Research at Northeastern University, pointed out that assigning police according to the incidence of serious crime is ineffective,

Committee on Uniform Crime Reporting  
National Sheriffs' Association;  
Uniform Crime Reporting Data Providers Advisory Policy Board

# FOREWORD

Essential to law enforcement planning and policy is timely and accurate information. Administered by the FBI since 1930, the Uniform Crime Reporting (UCR) Program has provided an important component of this information. Throughout the decades, continual effort has been made to improve quality, coverage, and presentation of the crime data supplied to the Program by law enforcement agencies across the country.

**Enhancements**—As part of that effort, several enhancements have been made to this year's *Crime in the United States*. Among the changes are an expansion in the time period for which Crime Index figures are presented, improved measures of seasonal variations in crime, enhanced references to tables and graphics, and more information about murder.

**New Feature**—A new feature is an examination of a currently important topic. This year's focus is upon arrests for juvenile violent, drug, and weapon offenses during the past 25 years.

**Telephone Guide**—While this publication provides a wealth of information, many users will desire additional detail and explanation. To assist these users, as well as data providers with questions concerning data submissions, a telephone guide has been included to facilitate inquiries.

**Future Reports**—Crucial to future reports, although not evident in this year's publication, has been increasing participation in the National Incident-Based Reporting System (NIBRS), which will greatly expand the available knowledge of crime in the United States. Likewise, collection of information about prejudice-motivated crimes in the United States was begun during 1991, thereby establishing a basis for examining trends. This first year's information will appear in a separate report.

The FBI, through UCR, is committed to working with other law enforcement agencies throughout the Nation to obtain criminal justice information which has never before been available but is needed for effective law enforcement.

William S. Sessions  
Director

# CRIME FACTORS

Each year when *Crime in the United States* is published, many entities—news media, tourism agencies, and others with an interest in crime in our Nation—compile rankings of cities and counties based on their Crime Index figures. These simplistic and/or incomplete analyses often create misleading perceptions which adversely affect cities and counties, along with their residents. Assessing criminality and law enforcement's response from jurisdiction to jurisdiction must encompass many elements, some of which, while having significant impact, are not readily measurable nor applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if crime assessment is to approach completeness and accuracy. There are several sources of information which may assist the responsible researcher. The U.S. Bureau of the Census data, for example, can be utilized to better understand the makeup of a locale's population. The transience of the population, its racial and ethnic makeup, its composition by age and gender, education levels, and prevalent family structures are all key factors in assessing and better understanding the crime issue.

The National League of Cities provides information regarding the economic and cultural makeup of cities and counties. Understanding a jurisdiction's industrial/economic base, its dependence upon neighboring jurisdictions, its transportation system, its economic dependence on nonresidents (such as tourists and convention attendees), its proximity to military reservations, etc., all help in better gauging and interpreting the crime known to and reported by law enforcement. More detailed information can, of course, be obtained from a city's or county's chamber of commerce, planning/information office, or other similar entity.

The strength (personnel and other resources) and the aggressiveness of a jurisdiction's law enforcement agency are also key factors. While information pertaining to the number of sworn and civilian law enforcement employees can be found in this publication, assessment of the law enforcement emphases is, of course, much more difficult. For example, one city may report more crime than a comparable one, not because there is more crime, but rather because its law enforcement agency through proactive efforts, such as "sting operations," identifies more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning more minor offenses, have an impact on the volume of crimes known to police.

It is incumbent upon all data users to become as well educated as possible about how to categorize and quantify the nature and extent of crime in the United States and in any of the over 16,000 jurisdictions represented by law enforcement contributors to this Program. This is only possible with careful study and analysis of the various unique conditions affecting each local law enforcement jurisdiction.

Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Some factors which are known to affect the volume and type of crime occurring from place to place are:

- Population density and degree of urbanization with size of locality and its surrounding area.
- Variations in composition of the population, particularly youth concentration.
- Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
- Modes of transportation and highway system.
- Economic conditions, including median income, poverty level, and job availability.
- Cultural factors and educational, recreational, and religious characteristics.
- Family conditions with respect to divorce and family cohesiveness.
- Climate.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphases of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
- Citizens' attitudes toward crime.
- Crime reporting practices of the citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. *The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, metropolitan areas, states, or colleges and universities solely on the basis of their population coverage or student enrollment.*

Data users are cautioned against comparisons of crime trends presented in this report and those estimated by the National Crime Victimization Survey (NCVS), administered by the Bureau of Justice Statistics. Because of differences in methodology and crime coverage, the two programs examine the Nation's crime problem from somewhat different perspectives, and their results are not strictly comparable. The definitional and procedural differences can account for many of the apparent discrepancies in results from the two programs. Appendix IV, "The Nation's Two Crime Measures," contains a detailed description of the NCVS and UCR.

Appendix VI—National Uniform Crime Reporting Program Directory .....	395

# SECTION I

## Summary of the Uniform Crime Reporting Program

The Uniform Crime Reporting (UCR) Program is a nationwide, cooperative statistical effort of over 16,000 city, county, and state law enforcement agencies voluntarily reporting data on crimes brought to their attention. During 1991, law enforcement agencies active in the UCR Program represented approximately 241 million inhabitants of the United States, or 96 percent of the total population as established by the Bureau of the Census. The coverage amounted to 98 percent of the United States population living in Metropolitan Statistical Areas (MSAs), 91 percent of the population in cities outside metropolitan areas, and 88 percent of the rural population.

Since 1930, the FBI has administered the Program and issued periodic assessments of the nature and type of crime in the Nation. While the Program's primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management, its data have over the years become one of the country's leading social indicators. The American public looks to UCR for information on fluctuations in the level of crime, while criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice use the statistics for varied research and planning purposes.

### Historical Background

Recognizing a need for national crime statistics, the International Association of Chiefs of Police (IACP) formed the Committee on Uniform Crime Records in the 1920s to develop a system of uniform police statistics. Establishing offenses known to law enforcement as the appropriate measure, the Committee evaluated various crimes on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas of the country, and likelihood of being reported to law enforcement. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 completed a plan for crime reporting which became the foundation of the UCR Program.

Seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. Known collectively as the Crime Index, these offenses included the violent crimes of murder and non-negligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at

a national total. Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense definitions by which law enforcement agencies were to submit data, without regard for local statutes, were formulated. The definitions used by the Program are set forth in Appendix II of this publication.

In January, 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. Congress enacted Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information that same year. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

### Advisory Groups

Providing vital links between local law enforcement and the FBI in the conduct of the UCR Program are the IACP and the National Sheriffs' Association (NSA). The IACP's Committee on Uniform Crime Records, as it has since the Program began, represents the thousands of police departments nationwide. The NSA's Committee on Uniform Crime Reporting, established in June, 1966, encourages sheriffs throughout the country to participate fully in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

To function in an advisory capacity concerning UCR policy and provide suggestions on UCR data usage, a Data Providers Advisory Policy Board was established in August, 1988. The Board is comprised of 20 city, county, and state law enforcement executives, representing the four geographic regions of the Nation.

The Association of State Uniform Crime Reporting Programs and committees on UCR within individual state law enforcement associations are also active in promoting interest in the UCR Program. These organizations foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the needs arise.

### Redesign of UCR

While throughout the years the UCR Program remained virtually unchanged in terms of the data collected and disseminated, a broad utility had evolved for UCR by the 1980s. Recognizing the need for improved statistics, law

enforcement called for a thorough evaluative study that would modernize the UCR Program. The FBI fully concurred with the need for an updated Program and lent its complete support, formulating a comprehensive three-phase redesign effort. The Bureau of Justice Statistics (BJS), the Department of Justice agency responsible for funding criminal justice information projects, agreed to underwrite the first two phases. Conducted by an independent contractor, these phases were structured to determine what, if any, changes should be made to the current Program. The third phase would involve implementation of the changes identified. Abt Associates Inc. of Cambridge, Massachusetts, overseen by the FBI, BJS, and a Steering Committee comprised of prestigious individuals representing a myriad of disciplines, commenced the first phase in 1982.

During the first phase, the historical evolution of the Program was examined. All aspects of the Program, including the objectives and intended user audience, data items, reporting mechanisms, quality control, publications and user services, and relationships with other criminal justice data systems, were studied.

Early in 1984, a conference on the future of UCR, held in Elkridge, Maryland, launched the second phase of the study, which would examine potential futures for UCR and conclude with a set of recommended changes. Attendees at this conference reviewed work conducted during the first phase and discussed the potential changes that should be considered during phase two.

Findings from the evaluation's first phase and input on alternatives for the future were also major topics of discussion at the seventh National UCR Conference in July, 1984. Overlapping phases one and two was a survey of law enforcement agencies.

Phase two ended in early 1985 with the production of a draft "Blueprint for the Future of the Uniform Crime Reporting Program." The study's Steering Committee reviewed the draft report at a March, 1985, meeting and made various recommendations for revision. The Committee members, however, endorsed the report's concepts.

In April, 1985, the phase two recommendations were presented at the eighth National UCR Conference. While various considerations for the final report were set forth, the overall concept for the revised Program was unanimously approved. The joint IACP/NSA Committee on UCR also issued a resolution endorsing the Blueprint.

The final report, the "Blueprint for the Future of the Uniform Crime Reporting Program," was released in the summer of 1985. It specifically outlined recommendations for an expanded, improved UCR Program to meet informational needs into the next century. There were three recommended areas of enhancement to the UCR Program. First, reporting of offenses and arrests would be made by means of an incident-based system. Second, collection of data would be accomplished on two levels. Agencies in level one would report important details about those

offenses comprising the current Crime Index, their victims, and arrestees. Law enforcement agencies covering populations of over 100,000 and a sampling of smaller agencies would be included in level two, which would collect expanded detail on all significant offenses. The third proposal involved introducing a quality assurance program.

One of the first actions taken by the FBI to begin implementation was to award a contract for the development of new offense definitions and data elements for the redesigned system. The work involved: (a) revision of the definitions of certain Index offenses; (b) identification of additional significant offenses to be reported; (c) refining definitions for both; and (d) development of data elements (incident details) for all UCR offenses in order to fulfill the requirements of incident-based reporting versus the current summary reporting.

Concurrent with the preparation of the data elements, the FBI studied the various state systems to select an experimental site for implementation of the redesigned Program. In view of its long-standing incident-based Program and well-established staff dedicated solely to UCR, the South Carolina Law Enforcement Division (SLED) was chosen. The SLED agreed to adapt its existing system to meet the requirements of the redesigned Program and collect data on both offenses and arrests relating to the newly defined offenses.

To assist SLED in conducting the pilot project, offense definitions and data elements developed under the private contract were put at the staff's disposal. Also, the FBI's Technical Services Division developed "Automated Data Capture Specifications" for use in adapting the state's data processing procedures to incorporate the revised system. The BJS supplied funding to facilitate needed software revisions. Testing of the new Program was completed in late 1987.

Following the completion of the pilot project conducted by SLED, the FBI produced a draft set of guidelines for an enhanced UCR Program. Law enforcement executives from around the country were then invited to a conference in Orange Beach, Alabama, where the guidelines were presented for final review.

During the conference, three overall endorsements were passed without dissent. First, that there be established a new, incident-based national crime reporting system; second, that the FBI manage this Program; and third, that an Advisory Policy Board composed of law enforcement executives be formed to assist in the direction and implementation of the new Program.

Information about the redesigned UCR Program, called the National Incident-Based Reporting System or NIBRS, is contained in four documents produced subsequent to the Orange Beach Conference. Volume 1, *Data Collection Guidelines*, contains a system overview and descriptions of the offenses, offense codes, reports, data elements, and data values used in the system. Volume 2, *Data Submission*

*Specifications*, is for the use of state and local systems personnel who are responsible for preparing magnetic tapes/floppy disks/etc., for submission to the FBI. Volume 3, *Approaches to Implementing an Incident-Based Reporting (IBR) System*, is for use by computer programmers, analysts, etc., responsible for developing a state or local IBR system which will meet NIBRS' reporting requirements. Volume 4, *Error Message Manual*, contains designations of mandatory and optional data elements, data element edits, and error messages.

A new NIBRS edition of the *UCR Handbook* has been produced to assist law enforcement agency data contributors implementing NIBRS within their departments. This document is geared toward familiarizing local and state law enforcement personnel with the definitions, policies, and procedures of NIBRS. It does not contain the technical coding and data transmission requirements presented in Volumes 1-4.

NIBRS will collect data on each single incident and arrest within 22 crime categories. For each offense known to police within these categories, incident, victim, property, offender, and arrestee information will be gathered when available. The goal of the redesign is to modernize crime information by collecting data presently maintained in law enforcement records; the enhanced UCR Program is, therefore, a byproduct of current records systems. The integrity of UCR's long-running statistical series will, of course, be maintained.

It became apparent during the development of the prototype system that the level one and level two reporting proposed in the "Blueprint" may not be the most practical approach. Many state and local law enforcement administrators indicated that the collection of data on all pertinent offenses could be handled with more ease than could the extraction of selected ones. While "Limited" participation, equivalent to the "Blueprint's" level one, will remain an option, it appears that most reporting jurisdictions, upon implementation, will go immediately to "Full" participation, meeting all NIBRS data submission requirements.

The implementation of NIBRS will be at a pace commensurate with the resources, abilities, and limitations of the contributing law enforcement agencies. The FBI was able to accept NIBRS data as of January, 1989, and four state-level UCR Programs (Alabama, Idaho, North Dakota, and South Carolina) are now supplying data in the NIBRS format. An additional 13 state agencies and the Department of the Interior have submitted test tapes containing the expanded data. Twenty-seven other Programs are in various stages of planning and development, with eight of those expected to submit test tapes during 1992.

## Recent Developments

**HATE CRIME STATISTICS**—The Hate Crime Statistics Act, passed by the U. S. Congress and signed by the President in April, 1990, mandates a 5-year data collection of crimes motivated by religious, ethnic, racial, or sexual-orientation prejudice. Collection commenced January 1, 1991, and the UCR Program has distributed hate crime *Data Collection Guidelines* and *Training Guides* to city, county, and state law enforcement agencies. Regional training sessions have been held across the Nation to assist state-level UCR Programs with implementation among their jurisdictions and to prepare state UCR personnel to train local law enforcement representatives within their respective states. Additional sessions are being held for local law enforcement, either in conjunction with their regular periodic UCR training or separately in FBI-sponsored seminars dealing solely with bias crime reporting. A hate crime "resource book," which draws together all the data now being maintained at the state and local levels concerning the incidence of hate crimes, is being published in the summer of 1992. This publication will precede the FBI's first issuance of statistics gathered under the UCR hate crime collection, which is scheduled for late 1992.

**LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED**—The UCR collection of data on law enforcement officers killed and assaulted was modified with the 1991 reporting year. Data on officers' slayings are expanded to include more information about the circumstances at the scene, the interaction between the victim and assailant, the weapons used, etc. An addition to the Program, a collection of information on serious assaults, has been developed and is pending final approval. Data identical to those collected on officers killed will be requested on all assaults resulting in injury and during which a firearm or knife was used. The assault information will be solicited from all levels of law enforcement in a manner similar to the current practice concerning officers killed. Initial notification will, of course, be gleaned from the monthly reports on officers killed and assaulted submitted by all UCR contributors.

**CRIME IN THE UNITED STATES**—Several changes have been made in this year's edition of *Crime in the United States* to improve the quality of the publication. For example, tables containing frequently requested data not before included in the book have been added, and some presentations have been modified or relocated in an attempt to make the publication easier to use. Additional changes are scheduled for the 1992 issue.

# CRIME CLOCK

every 19 seconds

The Crime Clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

# SECTION II

## Crime Index Offenses Reported

### CRIME INDEX TOTAL

#### DEFINITION

The Crime Index is composed of selected offenses used to gauge fluctuations in the overall volume and rate of crime reported to law enforcement. The offenses included are the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, motor vehicle theft, and arson.

#### TREND

<i>Year</i>	<i>Number of offenses<sup>1</sup></i>	<i>Rate per 100,000 inhabitants<sup>1</sup></i>
1990 .....	14,475,613	5,820.3
1991 .....	14,872,883	5,897.8
<i>Percent change</i> .....	+2.7	+1.3

<sup>1</sup>Does not include arson. See page 57.

The Crime Index total rose 3 percent over 1990 to nearly 15 million offenses reported to law enforcement in 1991. Index increases ranged from 2 percent in the Nation's cities to 5 percent in rural counties. Five- and 10-year percent changes showed the 1991 experience was 10 percent above the 1987 level and 15 percent higher than in 1982.

Geographically, the largest volume of Crime Index offenses was reported in the Southern States, which accounted for 37 percent of the total. Following were the Western States with 24 percent, the Midwestern States with 21 percent, and the Northeastern States with 18 percent. All regions except the Northeast showed Crime Index increases from 1990 to 1991. (See Table 4.)

Crime Index offenses occurred most frequently in August while the lowest totals were recorded in February.

**Table 2.1—Crime Index Total by Month, 1987-1991**

[Percent of annual total]

Months	1987	1988	1989	1990	1991
January .....	7.8	7.8	8.2	8.3	7.9
February .....	7.5	7.5	7.2	7.4	7.4
March .....	8.3	8.1	8.2	8.2	8.1
April .....	7.9	7.7	7.8	7.9	8.0
May .....	8.1	8.2	8.5	8.3	8.4
June .....	8.4	8.3	8.5	8.3	8.5
July .....	8.9	9.0	9.2	8.9	9.1
August .....	9.1	9.5	9.3	9.1	9.2
September .....	8.4	8.6	8.4	8.4	8.4
October .....	8.5	8.7	8.7	8.7	8.7
November .....	8.2	8.3	8.1	8.2	8.0
December .....	8.9	8.5	7.9	8.6	8.3

## Rate

Crime rates relate the incidence of crime to population. Nationwide in 1991, there were an estimated 5,898 Crime Index offenses for each 100,000 in population. The Crime Index rate was highest in metropolitan areas and lowest in rural counties. (See Table 2.) Overall, the 1991 Crime Index rate was 1 percent higher than in 1990, 6 percent higher than in 1987, and 5 percent above the 1982 total.

Regionally, the Crime Index rates ranged from 6,478 in the West to 5,155 in the Northeast. The 2-year percent changes showed a 1-percent rate decline in the Northeast and increases in the remaining regions. (See Table 4.)

## Nature

The Crime Index is composed of violent and property crime categories, and in 1991, 13 percent of the Index

offenses reported to law enforcement were violent crimes and 87 percent, property crimes. Larceny-theft was the offense with the highest volume, while murder accounted for the fewest offenses. (See Chart 2.4.)

Property estimated in value at \$16.7 billion was stolen in connection with all Crime Index offenses, with the largest losses due to thefts of motor vehicles; jewelry and precious metals; and televisions, radios, stereos, etc. Law enforcement agencies nationwide recorded a 38-percent recovery rate for dollar losses in connection with stolen property. The highest recovery percentages were for stolen motor vehicles, consumable goods, livestock, clothing and furs, and firearms. (See Table 24.)

## Law Enforcement Response

Law enforcement agencies nationwide recorded a 21-percent clearance rate for the collective Crime Index offenses in 1991 and made an estimated 3 million arrests for Index crimes. Crimes can be cleared by arrest or by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. The arrest of one person may clear several crimes, or several persons may be arrested in connection with the clearance of one offense.

The Index clearance rate has remained relatively stable throughout the past 10-year period. Similar to the 1991 experience, it was 21 percent in 1987 and 20 percent in 1982.

Arrests for Index crimes were up 2 percent in 1991 as compared to 1990. Considering longer timeframes, law enforcement agencies in 1991 made 13 and 18 percent more arrests than in the years 1987 and 1982, respectively.

When compared to 1990 figures, 3-percent increases in arrests for murder and robbery were shown in 1991, and the only Crime Index offense indicating a decrease in arrests was motor vehicle theft, 2 percent. Adult arrests for Index crimes were up less than 1 percent, while those of juveniles rose 5 percent. The largest increases in juvenile arrests were shown in arson with 11 percent and robbery at 10 percent.

As in past years, larceny-theft arrests accounted for the highest volume of Crime Index arrests at over 1.2 million. (See Table 42.)

# REGIONAL VIOLENT AND PROPERTY CRIME RATES 1991

per 100,000 inhabitants

## VIOLENT CRIME TOTAL

### DEFINITION

Violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. All violent crimes involve force or threat of force.

### TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
<i>1990 .....</i>	<i>1,820,127</i>	<i>731.8</i>
<i>1991 .....</i>	<i>1,911,767</i>	<i>758.1</i>
<i>Percent change .....</i>	<i>+5.0</i>	<i>+3.6</i>

Violent crimes reported to law enforcement during 1991 exceeded 1.9 million offenses. The annual total was the highest ever recorded, up 5 percent over 1990, 29 percent over 1987, and 45 percent over 1982. From 1990 to 1991 the Nation's cities collectively recorded a 5-percent rise, while the rural and suburban counties recorded increases of 6 and 4 percent, respectively.

Regionally, the South, the most populous region, accounted for 36 percent of all violent crimes reported in 1991. Lesser volumes of 24 percent for the West and 20 percent for both the Northeast and Midwest were recorded. Three of the four regions registered increases in the numbers of violent crimes reported from 1990 to 1991. The Northeastern States experienced a less than 1-percent decline. (See Table 4.)

Violent crimes occur more frequently in the summer months, while the lowest totals are experienced during the winter.

**Table 2.2—Violent Crime Total by Month, 1987-1991**

[Percent of annual total]

Months	1987	1988	1989	1990	1991
January .....	7.9	7.7	8.0	7.9	7.6
February .....	7.4	7.3	6.9	6.9	7.0
March .....	8.0	7.9	7.9	7.8	7.8
April .....	7.9	7.7	7.9	7.8	7.8
May .....	8.4	8.4	8.4	8.5	8.6
June .....	8.5	8.4	8.4	8.8	8.7
July .....	9.0	9.3	9.2	9.5	9.2
August .....	9.2	9.4	9.0	9.1	9.5
September .....	8.5	8.9	8.8	8.8	8.8
October .....	8.6	8.7	9.1	8.5	8.8
November .....	8.1	8.0	8.4	7.9	8.0
December .....	8.7	8.3	8.2	8.4	8.2

## Rate

During 1991, an all-time high of 758 violent crimes was reported to law enforcement for every 100,000 United States inhabitants. The 1991 violent crime rate was 4 percent higher than the 1990 rate, 24 percent above the 1987 rate, and 33 percent above the 1982 figure. The violent crime rate was highest in the Nation's cities, collectively registering 1,015 offenses per 100,000 population. The suburban counties' rate was 470, and for rural counties, it was 214.

The Western States registered the highest overall violent crime rate per 100,000 inhabitants, 841, and the Midwestern States the lowest, 631. Among the geographic regions, only the Northeast experienced a rate decline, 1 percent. The increases in the other regions were 4 percent in the South and West and 6 percent in the Midwest. (See Table 4.)

## Nature

Aggravated assaults accounted for 57 percent of the violent crimes reported to law enforcement during 1991. Robberies comprised 36 percent; forcible rapes, 6 percent; and murders, 1 percent.

While data concerning weapons used in connection with forcible rape are not collected, firearms were the weapons used in 31 percent of all murders, robberies, and aggravated assaults, collectively, in 1991. Knives or cutting instruments were used in 15 percent; other dangerous weapons in 22 percent, and personal weapons (hands, fists, feet, etc.) in 32 percent. The proportion of violent crimes committed with firearms has increased in recent years. In 1987, firearms were employed in the commission of 26 percent of violent offenses.

## Law Enforcement Response

The 1991 violent crime clearance rate was 45 percent, down from 46 percent in 1990. Conversely, the number of arrests for violent crimes rose 2 percent in the same period. Adult arrests showed virtually no change from 1990 to 1991, while those of juveniles (under age 18) increased 8 percent. (See Section IV, Persons Arrested.)

Violent crime arrests, 1991 versus 1990, were up 1 percent in cities overall, 2 percent in suburban counties, and 5 percent in rural counties.

In 1991, there were an estimated 718,890 persons arrested for violent crime. Violent crime arrests accounted for 5 percent of the total arrests for all offenses. Males made up 88 percent of all violent crime arrestees and whites, 54 percent. (See Tables 42 and 43.)

# VIOLENT CRIME

CHART 2.6  
VARIATION FROM MONTHLY AVERAGE  
1991

CHART 2.7  
PERCENT CHANGE FROM 1987

## MURDER AND NONNEGLIGENT MANSLAUGHTER

### DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

### TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1990 .....	23,438	9.4
1991 .....	24,703	9.8
<i>Percent change</i> .....	+5.4	+4.3

Reaching an all-time high during 1991, the total number of murders in the United States for the year was estimated at 24,703. More persons were murdered in August than any other month in 1991, while the fewest were killed during February.

**Table 2.3—Murder by Month, 1987-1991**

[Percent of annual total]

Months	1987	1988	1989	1990	1991
January .....	7.7	8.2	8.1	7.9	8.0
February .....	7.9	7.2	7.1	7.0	7.0
March .....	8.2	7.7	7.8	8.0	7.7
April .....	7.6	7.7	7.9	7.4	7.8
May .....	8.6	7.8	7.8	8.1	8.1
June .....	7.8	7.7	8.2	8.4	8.6
July .....	8.6	8.9	9.1	9.6	9.1
August .....	8.9	9.5	9.0	9.3	9.4
September .....	8.3	8.9	8.8	9.2	8.8
October .....	8.8	8.9	8.9	8.8	8.6
November .....	8.3	8.2	8.5	7.6	7.8
December .....	9.1	9.2	8.7	8.8	9.0

When viewing the four regions of the Nation, the Southern States, the most populous, accounted for 43 percent of the murders. The Western States reported 21 percent; the Midwestern States, 19 percent; and the Northeastern States, 17 percent. Among the regions, only the Northeast registered a decline from 1990 to 1991, 2 percent. (See Table 3.)

The murder volume was up 5 percent nationwide in 1991 over 1990. In the Nation's cities overall, murder increased 6 percent, with the greatest increase—21 percent—registered in cities with populations of 50,000 to 99,999. Suburban counties recorded a 2-percent rise in their murder volumes, while rural counties registered a 1-percent decrease.

The accompanying chart reveals a 23-percent rise nationally in the murder counts from 1987 to 1991. The 10-year trend showed the 1991 total 18 percent above the 1982 level.

## Rate

A murder rate of 10 per 100,000 inhabitants was registered nationwide in 1991. Two-, 5-, and 10-year trends showed the 1991 rate was 4 percent higher than in 1990, 19 percent above the 1987 rate, and 8 percent higher than the 1982 rate.

On a regional basis, the South averaged 12 murders per 100,000 people; the West, 10 per 100,000; and the Northeast and Midwest, 8 per 100,000. Compared to 1990, murder rates in 1991 increased in three of the four geographic regions with the only decline in the Northeast, 2 percent. (See Table 4.)

The Nation's metropolitan areas reported a 1991 murder rate of 11 victims per 100,000 inhabitants. In the rural counties, the rate was 6 per 100,000, and in cities outside metropolitan areas, the rate was 5 per 100,000.

## Nature

Supplemental data provided by contributing agencies recorded information for 21,505 of the estimated 24,703 murders in 1991. Submitted monthly, the data consist of the age, sex, and race of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

Based on this information, 78 percent of the murder victims in 1991 were males; and 89 percent were persons 18 years of age or older. Forty-eight percent were aged 20 through 34 years. Considering victims for whom race was known, an average of 50 of every 100 were black, 47 were white, and the remainder were persons of other races.

Supplemental data were also reported for 24,578 murder offenders in 1991. Of those for whom sex and age were reported, 90 percent were males, and 87 percent were persons 18 years of age or older. Seventy-seven percent

were aged 15 through 34 years. Of offenders for whom race was known, 55 percent were black, 43 percent were white, and the remainder were persons of other races.

Data based on incidents involving one victim and one offender showed that in 1991, 93 percent of the black murder victims were slain by black offenders, and 85 percent of the white murder victims were killed by white offenders. Likewise, males were most often slain by males (87 percent in single victim/single offender situations). These same data showed, however, that 9 of every 10 female victims were murdered by males.

As in previous years, firearms were the weapons used in approximately 7 of every 10 murders committed in the United States. Of those murders for which weapons were reported, 55 percent were by handguns, 5 percent by shotguns, and 4 percent by rifles. Other or unknown types of firearms accounted for another 5 percent of the total murders. Among the remaining weapons, cutting or stabbing instruments were employed in 16 percent of the murders; blunt objects (clubs, hammers, etc.) in 5 percent; personal weapons (hands, fists, feet, etc.) in 6 percent; and other dangerous weapons, such as poison, explosives, etc., in the remainder. A state-by-state breakdown of weapons used in connection with murder is shown in Table 20.

**Table 2.8—Murder, Type of Weapons Used, 1991**  
[Percent distribution by region]

Region	Total all weapons <sup>1</sup>	Firearms	Knives or cutting instruments	Unknown or other dangerous weapons	Personal weapons (hands, fists, feet, etc.)
Total	100.0	66.3	15.8	12.3	5.5

<sup>1</sup>Pushed is included in personal weapons.<sup>2</sup>Because of rounding, percentages may not add to totals.<sup>3</sup>Does not include unknown ages.<sup>4</sup>Includes drownings.

Almost half of the murder victims in 1991 were either related to (12 percent) or acquainted with (34 percent) their assailants. Fifteen percent of the victims were murdered by strangers, while the relationships among victims and offenders were unknown for 38 percent of the murders. Among all female murder victims in 1991, 28 percent were slain by husbands or boyfriends. Four percent of the male victims were killed by wives or girlfriends.

Arguments resulted in 32 percent of the murders during the year. Twenty-one percent occurred as a result of felonious activities such as robbery, arson, etc., while another 1 percent were suspected to have been the result of some felonious activity. Three percent of the murders were committed during brawls while offenders were under the influence of alcohol or narcotics. Table 2.13 shows murder circumstances for the past 5 years.

<sup>1</sup>Total number of murder victims for which supplemental homicide information was received.

## Law Enforcement Response

The clearance rate for murder continued to be higher than for any other Crime Index offense. Law enforcement agencies nationwide recorded a 67-percent clearance rate for 1991. Eighty percent of murders in rural counties, 67 percent of those in suburban counties, and 66 percent of those in the Nation's cities were cleared. Cities with populations under 25,000 reported the most successful clearance rate, 77 percent. (See Table 25.)

Geographically, the South, the most populous region, registered the highest murder clearance rate, 71 percent. Following were the Midwestern States with 66 percent, the Northeastern States with 64 percent, and the Western States with 63 percent.

Persons under 18 years of age accounted for 8 percent of the willful killings cleared by law enforcement nationally, as well as in the Nation's cities and suburban counties during 1991. Five percent of the rural county clearances involved only persons in this young-age group. This proportion of juvenile involvement was lower than for any other Index offense.

Fifty-five percent of all murder arrestees in 1991 were under 25 years of age. The 18- to 24-year age group accounted for 41 percent of the total. (See Table 38.)

Ninety percent of those arrested were males and 10 percent, females. Blacks comprised 55 percent of the total arrestees for murder in 1991. Whites made up 43 percent, and the remainder were of other races.

Compared to the 1990 level, the 1991 murder arrest total increased 3 percent. Arrests of persons aged 18 and over increased 2 percent, and those of younger persons were up 4 percent. During the same 2-year period, male arrests increased 3 percent, while female arrests showed virtually no change.

Long-term trends indicate the 1991 murder arrest total was 28 percent above the 1987 level and 18 percent higher than the 1982 figure.

## Justifiable Homicide

Certain willful killings are classified as justifiable or excusable, based on law enforcement investigation. In Uniform Crime Reporting, justifiable homicide is defined as and limited to the killing of a felon by a law enforcement officer in the line of duty, or the killing of a felon, during the commission of a felony, by a private citizen. These offenses are tabulated independently and are not included in the murder counts.

In 1991, the justifiable homicide total was 693, down 3 percent from the 1990 total of 713 but 27 percent higher than the 1987 total of 546. Of the justifiable homicides in 1991, 366 involved law enforcement officers and 327 were by private citizens. Data on weapons used in connection with justifiable homicide showed that handguns were the weapons used most often. (See Tables 2.15 and 2.16.)

**Table 2.15—Justifiable Homicide by Weapon, Law Enforcement,<sup>1</sup> 1987-1991**

Year	Total	Firearm total	Handgun	Rifle	Shotgun	Firearm type not specified	Knife or cutting instrument	Other dangerous weapon	Personal weapons

## FORCIBLE RAPE

### DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

### TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1990 .....	102,555	41.2
1991 .....	106,593	42.3
<i>Percent change</i> .....	+3.9	+2.7

An estimated 106,593 forcible rapes were reported to law enforcement agencies across the Nation during 1991. The 1991 total was 4 percent higher than the 1990 level. The accompanying chart (2.11) shows consecutive increases in volume for the last 5 years.

Geographically, more forcible rapes were reported in the Southern States than in any other region, during 1991. The lowest number of rapes was reported in the Northeast. (See Table 4.) Even though the South reported the largest volume of rapes, their proportion of the total forcible rapes has remained constant over the past 10 years. The Midwest has shown an increase in its proportion of total rapes, while the Northeast and West have shown declines. All geographic regions recorded increases in the rape volume from 1990 to 1991. Among the population groupings, only cities with populations over 500,000 recorded an increase. (See Tables 4 and 12.)

**Table 2.17—Forcible Rape by Month, 1987-1991**

(Percent of annual total)

Months	1987	1988	1989	1990	1991
January .....	7.2	7.4	7.4	7.6	7.1
February .....	6.8	7.3	6.3	6.7	7.0
March .....	8.1	8.0	7.7	7.9	7.9
April .....	8.2	8.0	8.3	8.1	8.3
May .....	8.9	9.0	8.6	9.1	9.2
June .....	9.3	8.7	8.9	9.0	9.2
July .....	9.7	9.9	10.0	9.6	9.5
August .....	9.8	9.8	9.5	9.4	9.7
September .....	8.9	9.0	8.8	9.1	8.8
October .....	8.1	8.4	8.9	8.4	8.6
November .....	7.7	7.6	8.3	7.7	7.8
December .....	7.3	6.8	7.3	7.4	6.8

The greatest numbers of forcible rapes were reported during the summer months.

## Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female. In 1991, an estimated 83 of every 100,000 females in the country were reported rape victims, an increase of 3 percent over the 1990 rate. Since 1987, the female forcible rape rate has risen 13 percent.

Female forcible rape rates for 1991 showed there were 91 victims per 100,000 females in MSAs, 67 per 100,000 females in cities outside metropolitan areas, and 46 per 100,000 females in rural counties. Although MSAs recorded the highest rape rates, they have shown the smallest change over the past 10 years. During this time, the greatest rate increase was shown in cities outside metropolitan areas, 71 percent. MSAs and rural areas showed lesser increases, 19 percent and 61 percent, respectively.

Regionally, in 1991, the highest female rape rate was in the Western States, which recorded 91 victims per 100,000

females. Following were the Midwestern States with a rate of 89, the Southern States with 88, and the Northeastern States with 57. From 1982-1991, the greatest increase in the female rape rate was shown in the Midwest, followed by the South, and the Northeast. The West remained fairly stable over the past 10 years.

## Nature

Rapes by force constitute the greatest percentage of total forcible rapes, 86 percent of the 1991 experience. The remainder were attempts or assaults to commit forcible rape. The number of rapes by force increased 4 percent in 1991 over the 1990 volume, while attempts to rape decreased 4 percent. Ten years of data show the percentage of rapes by force consistently increasing.

As for all other Crime Index offenses, complaints of forcible rape made to law enforcement agencies are sometimes found to be false or baseless. In such cases, law enforcement agencies "unfound" the offenses and exclude them from crime counts. The "unfounded" rate, or percentage of complaints determined through investigation to be false, is higher for forcible rape than for any other Index crime. In 1991, 8 percent of forcible rape complaints were "unfounded," while the average for all Index crimes was 2 percent.

## Law Enforcement Response

Nationwide, as well as in the cities and suburban counties, over half of the forcible rapes reported to law enforcement were cleared by arrest or exceptional means in 1991. Rural county law enforcement agencies cleared a slightly higher percentage of the offenses brought to their attention than did city and suburban law enforcement agencies. (See Table 25.)

Clearance rates for the regions were lowest in the Midwestern States and highest in the Southern States. (See Table 26.)

Of the total clearances for forcible rape in the country as a whole, 13 percent involved only persons under 18 years of age. The percentage of juvenile involvement varied by community type. (See Table 28.)

The number of arrests for forcible rape rose 1 percent nationwide. Increases were also experienced in the Nation's cities and rural counties from 1990 to 1991, while forcible rape arrests were down 1 percent in the suburban counties. (See Tables 36, 44, 50, and 56.)

Of the forcible rape arrestees in 1991, about 3 of every 10 were in the 18- to 24-year age group. Over half of those arrested were white. (See Tables 38 and 43.)

VARIATION FROM MONTHLY AVERAGE  
**1991**

CHART 2 11  
PERCENT CHANGE FROM 1987

## ROBBERY

### DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

### TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
<i>1990</i> .....	<i>639,271</i>	<i>257.0</i>
<i>1991</i> .....	<i>687,732</i>	<i>272.7</i>
<i>Percent change</i> .....	<i>+7.6</i>	<i>+6.1</i>

Accounting for 5 percent of all Index crimes and 36 percent of the violent crimes in 1991, robbery was estimated at 687,732 offenses for the year. Robberies occurred most frequently in October and December and least often in April during 1991.

**Table 2.18—Robbery by Month, 1987-1991**

[Percent of annual total]

Months	1987	1988	1989	1990	1991
January .....	8.9	8.6	8.8	8.7	8.7
February .....	8.1	7.9	7.4	7.3	7.5
March .....	8.2	8.0	8.0	8.1	8.0
April .....	7.5	7.3	7.3	7.2	7.4
May .....	7.5	7.6	7.6	7.7	7.8
June .....	7.6	7.6	7.6	7.8	7.8
July .....	8.3	8.4	8.4	8.5	8.4
August .....	8.7	8.7	8.6	8.8	8.8
September .....	8.5	8.7	8.6	8.6	8.5
October .....	8.8	9.1	9.2	8.9	9.2
November .....	8.5	9.0	9.0	8.7	8.7
December .....	9.2	9.2	9.3	9.6	9.2

Nationally, the 1991 robbery volume was 8 percent higher than the 1990 level. During the same time period, robberies were up 11 percent in the rural counties, 10 percent in the suburban counties, and 7 percent in the Nation's cities overall. (See Table 12.)

Distribution figures for the regions showed that the most populous Southern States registered 32 percent of all reported robberies. (See Table 3.) Two-year trends show the number of robberies in 1991 was up in three of the four regions as compared to 1990. The increases were 12 percent in the West, 13 percent in the Midwest, and 8 percent in the South. The Northeast showed no change during the same time period.

Chart 2.13 depicts the national trend in the robbery volume, as well as the robbery rate, for the years 1987-1991. In 1991, the number of robbery offenses was 33 percent higher than in 1987 and 24 percent above the 1982 total.

**Rate**

The national robbery rate in 1991 was 273 per 100,000 people, 6 percent higher than in 1990. In metropolitan areas, the robbery rate was 341; in cities outside metropolitan areas, it was 70; and in the rural areas, it was 17. With

1,189 robberies per 100,000 inhabitants, the highest rate was recorded in cities with a million or more inhabitants. (See Table 16.)

A comparison of 1990 and 1991 regional rates per 100,000 inhabitants indicated the rate of 287 in the West jumped 9 percent; the rate of 223 in the Midwest was up 12 percent; and the rate of 252 in the South increased 6 percent. The Northeast's rate of 352 was less than 1 percent lower than the previous year.

**Nature**

In 1991, a total estimated national loss of \$562 million was due to robberies. The value of property stolen during robberies averaged \$817 per incident. Average dollar losses ranged from \$387 taken during robberies of convenience stores to \$3,177 per bank robbery. (See Table 23.) The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

As in previous years, robberies on streets or highways accounted for more than half (56 percent) of the offenses in this category. Robberies of commercial and financial establishments accounted for an additional 22 percent, and those occurring at residences, 10 percent. The remainder were miscellaneous types. By type, all categories of robbery showed increases from 1990 to 1991. The increases ranged from 2 percent for convenience store robberies to 17 percent for bank robberies. (See Table 23.)

<sup>1</sup>Because of rounding, percentages may not add to totals.

Forty percent of all robberies in 1991 were committed through the use of strong-arm tactics and another 40 percent were by firearms. Knives or cutting instruments were used in 11 percent, and other dangerous weapons in the remainder. A comparison of 1990 and 1991 robbery totals by weapon showed those by firearms were up 17 percent; those by other dangerous weapons rose 3 percent; and those by strong-arm tactics increased 1 percent. Robberies by knives or cutting instruments showed the only decline, 2 percent. A state-by-state breakdown of weapons used in robberies in 1991 is shown in Table 21.

Table 2.21—Robbery, Type of Weapons Used, 1991

[Percent distribution by region]

Region	Total all weapons <sup>1</sup>	Armed			Strong-armed

<sup>1</sup>Because of rounding, percentages may not add to totals.

Law Enforcement Response

The 1991 national robbery clearance rate was 24 percent nationwide, as well as in cities collectively. Suburban

county agencies cleared 27 percent, while the highest robbery clearance rate—40 percent—was registered by rural county law enforcement agencies. (See Table 25.) Regional robbery clearance percentages ranged from 21 percent in the Midwest to 26 percent in the South. (See Table 26.)

Nationally and in cities, persons under the age of 18 were the offenders in 13 percent of all 1991 robbery clearances. This age group accounted for 18 percent of the suburban county clearances and 11 percent of the rural county clearances.

Arrests for robbery rose 3 percent nationwide during 1991 when compared to 1990. For the same 2-year period, increases in the number of persons arrested for robbery were 2 percent in the cities collectively, 12 percent in the suburban counties, and 18 percent in the rural counties.

Sixty-two percent of all robbery arrestees in 1991 were under 25 years of age, and 91 percent were males. Sixty-one percent of those arrested were black, 38 percent were white, and the remainder were of other races.

The total number of robbery arrests was up 27 percent during the 5-year period, 1987-1991. For the same time-span, arrests of females for robbery jumped 31 percent, and male arrests increased 27 percent. Juvenile arrests rose 52 percent, and those of persons 18 years of age and older increased 20 percent.

### Street Robbery

### Commercial House Robbery

### Gas Station Robbery

### Convenience Store Robbery

### Residence Robbery

### Bank Robbery

## AGGRAVATED ASSAULT

### DEFINITION

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

### TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1990 .....	1,054,863	424.1
1991 .....	1,092,739	433.3
Percent change .....	+3.6	+2.2

Totaling an estimated 1,092,739 offenses nationally, aggravated assaults in 1991 accounted for 57 percent of the violent crimes. Geographic distribution figures show that 39 percent of the aggravated assault volume was accounted for by the most populous South, 25 percent by the West, 20 percent by the Midwest, and 17 percent by the Northeast. Among the regions, only the Northeast registered a decline in aggravated assaults. (See Table 3.)

The 1991 monthly figures show that the greatest number of aggravated assaults was recorded during August, while the lowest volume occurred in February.

**Table 2.22—Aggravated Assault by Month, 1987-1991**

[Percent of annual total]

Months	1987	1988	1989	1990	1991
January .....	7.3	7.2	7.5	7.4	6.9
February .....	7.0	7.0	6.6	6.7	6.6
March .....	7.8	7.9	7.9	7.8	7.7
April .....	8.1	8.1	8.1	8.2	8.1
May .....	8.9	8.9	8.9	9.0	9.1
June .....	8.9	9.0	8.9	9.4	9.3
July .....	9.5	9.8	9.6	10.1	9.7
August .....	9.5	9.8	9.2	9.3	9.9
September .....	8.7	9.0	8.8	8.9	9.0
October .....	8.5	8.4	9.1	8.3	8.6
November .....	7.9	7.5	7.9	7.4	7.6
December .....	7.8	7.5	7.5	7.5	7.6

In 1991, aggravated assaults were up 4 percent nationwide as compared to 1990. For the same time period, cities collectively experienced a 3-percent increase in the aggravated assault volume, with cities from 250,000 to 499,999 recording the greatest rise, 8 percent. Cities with populations from 500,000 to 999,999 experienced the only decline, 2 percent. The suburban counties registered a 2-percent increase and the rural counties, a 5-percent rise for the 2-year period. (See Table 12.)

Five- and 10-year trends for the country as a whole show aggravated assaults up 28 percent above the 1987 level and 63 percent over the 1982 experience. (See Table 1.)

#### Rate

Up 2 percent above the 1990 rate, there were 433 reported victims of aggravated assault for every 100,000

people nationwide in 1991. The rate was 23 percent higher than in 1987 and 50 percent above the 1982 rate.

Higher than the national average, the rate in metropolitan areas was 487 per 100,000 in 1991. Cities outside metropolitan areas experienced a rate of 372, and rural counties, a rate of 170.

Regionally, the aggravated assault rates ranged from 498 per 100,000 people in the West to 355 per 100,000 in the Midwest. Compared to 1990, 1991 aggravated assault rates were up in three of the four regions, with only the Northeast showing a decline, 1 percent. (See Table 4.)

#### Nature

In 1991, 31 percent of the aggravated assaults were committed with blunt objects or other dangerous weapons. Of the remaining weapon categories, personal weapons such as hands, fists, and feet were used in 27 percent of the offenses; firearms in 24 percent; and knives or cutting instruments in the remainder.

From 1990 to 1991, assaults with firearms and those involving personal weapons increased 7 percent. Those committed with knives or cutting instruments were down 2 percent, and those involving blunt objects or other dangerous weapons decreased less than 1 percent. Assault by weapon totals by state for 1991 are shown in Table 22.

**Table 2.23—Aggravated Assault, Type of Weapons Used, 1991**

[Percent distribution by region]

Region	Total all weapons <sup>1</sup>	Fire-arms	Knives or cutting instruments	Other weapons (clubs, blunt objects, etc.)	Personal weapons
Total .....	100.0	23.6	18.4	30.8	27.1
Northeastern States .....	100.0	17.1	21.2	31.6	30.1
Midwestern States .....	100.0	26.8	18.2	32.5	22.5
Southern States .....	100.0	27.2	20.2	30.7	21.9
Western States .....	100.0	21.3	14.4	29.5	34.8

<sup>1</sup>Because of rounding, percentages may not add to totals.

# AGGRAVATED ASSAULT

CHART 2 15  
VARIATION FROM MONTHLY AVERAGE  
**1991**

CHART 2 16  
PERCENT CHANGE FROM 1987

## **Law Enforcement Response**

During 1991, law enforcement agencies nationwide recorded a 57-percent aggravated assault clearance rate. The cities collectively reported 55 percent cleared, while the suburban and rural county law enforcement agencies cleared 62 and 66 percent, respectively. Among the city groupings, those with populations under 10,000 recorded the highest clearance rate, 66 percent. (See Table 25.)

Regional clearance percentages for aggravated assault were 60 percent in the West, 58 percent in the South, 54 percent in the Northeast, and 50 percent in the Midwest.

Eleven percent of the clearances reported nationally and in cities involved only persons under age 18. Persons in this age group were identified as the assailants in 13

percent of the clearances in the suburban counties and 7 percent of those in the rural counties.

The estimated 480,900 persons arrested for aggravated assault in 1991 represented two-thirds of all arrestees for violent crimes. Whites comprised 60 percent of the arrestees; blacks, 38 percent; and all other races, the remainder. Eighty-six percent of the arrestees were males and 14 percent, females.

Total arrests for aggravated assault were up 1 percent in 1991 from the 1990 total. During this 2-year period, arrests of persons under age 18 increased 7 percent, while arrests of adults showed virtually no change. A comparison of 1987 and 1991 figures showed increases of 32 percent for total arrests, 52 percent for juvenile arrests, and 29 percent for adult arrests.

## PROPERTY CRIME TOTAL

### DEFINITION

Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of these offenses is the taking of money or property, but there is no force or threat of force against the victims.

### TREND

<i>Year</i>	<i>Number of offenses<sup>1</sup></i>	<i>Rate per 100,000 inhabitants<sup>1</sup></i>
1990 .....	12,655,486	5,088.5
1991 .....	12,961,116	5,139.7
<i>Percent change</i> .....	+2.4	+1.0

<sup>1</sup>Does not include arson. See page 57.

An all-time high of nearly 13 million property crimes was reported in 1991. The total was 2 percent higher than that for 1990, 8 percent above the 1987 experience, and 11 percent over the 1982 figure.

Regionally, property crime was up 4 percent in the Midwest and rose 3 percent in both the South and the West. The Northeast showed a decrease of less than 1 percent in the property crime volume from 1990. By population group, property crime showed the greatest increase in rural counties, 5 percent. (See Table 12.)

As in previous years, 1991 monthly figures show more property crime occurred in August, while the lowest number was reported in February.

**Table 2.24—Property Crime total by Month, 1987-1991**

[Percent of annual total]

Months	1987	1988	1989	1990	1991

November .....	8.2	8.3	8.1	8.2	8.0
December .....	8.9	8.5	7.9	8.6	8.4

## Rate

In 1991, there were an estimated 5,140 property crimes for every 100,000 United States inhabitants. The 1991 property crime rate was 1 percent higher than the 1990 rate, 4 percent over the 1987 rate, and 2 percent above the 1982 rate.

Geographically, the 1991 property crime rate was 5,637 per 100,000 in the West, up 1 percent; 5,618 in the South, up 1 percent; 4,626 in the Midwestern States, a 3-percent increase; and 4,403 in the Northeast, a 1-percent decline.

Property crime rates for 1991 were 5,730 in Metropolitan Statistical Areas, 4,955 in cities outside of MSAs, and 1,888 in rural counties. By population group, the highest rate—9,127—was recorded in cities with populations from 250,000 to 499,999. (See Table 16.)

## Nature

Total dollar losses due to property crime were estimated at \$16.1 billion in 1991. The average loss per offense was \$1,243.

In 1991, larceny-theft accounted for 63 percent of all property crime. Burglary accounted for 24 percent and motor vehicle theft for 13 percent. Although arson is excluded from the property crime offense and clearance tabulations because of its limited timespan as an Index offense and lower national coverage, it accounted for another 99,784 offenses and an average dollar loss of \$11,980 per arson in 1991, based on data from 11,706 law enforcement agencies.

Regionally, 38 percent of property crime was accounted for by the Southern States, 24 percent by the Western States, 21 percent by the Midwestern States, and 17 percent by the Northeastern States.

## Law Enforcement Response

Property crimes generally have the lowest clearance rates. In 1991, the overall property crime clearance rate was 18 percent, the same as the 1990 rate. The property crime clearance rate was also 18 percent in three of the four regions, with the Northeast recording a lesser rate of 17 percent. (See Table 26.)

Twenty-two percent of the property crimes cleared by law enforcement nationwide and in cities in 1991 involved only young people under age 18. The juvenile percentage was 24 percent in suburban counties and 19 percent in rural counties. (See Table 28.)

The estimated 2.3 million persons arrested for property crimes in 1991 accounted for 16 percent of all arrestees. The volume of property crime arrests in 1991 was 2 percent above 1990, 9 percent over 1987, and 12 percent higher than the 1982 total. Compared to 1990 totals, juvenile and adult property crime arrests in 1991 showed increases nationwide as well as in cities and suburban and rural counties. (See Tables 36, 44, 50, and 56.) In 1991, 75 percent of all property crime arrestees were males, and 66 percent of the total were white.

# PROPERTY CRIME

CHART 2.17  
VARIATION FROM MONTHLY AVERAGE  
1991

CHART 2.18  
PERCENT CHANGE FROM 1987

## BURGLARY

### DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

### TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1990 .....	3,073,909	1,235.9
1991 .....	3,157,150	1,252.0
<i>Percent change</i> .....	+2.7	+1.3

An estimated 3,157,150 burglaries occurred in the United States during 1991. These offenses accounted for 21 percent of the total Crime Index and 24 percent of the property crimes.

Distribution figures for the regions showed that the highest burglary volume occurred in the most populous Southern States, accounting for 41 percent of the total. The Western States followed with 23 percent, the Midwestern States with 20 percent, and the Northeastern States with 16 percent.

In 1991, the greatest numbers of burglaries were recorded during July and August, while the lowest count was reported in February.

**Table 2.25—Burglary by Month, 1987-1991**

[Percent of annual total]

Months	1987	1988	1989	1990	1991
January .....	8.4	8.4	8.8	8.8	8.1
February .....	7.8	7.8	7.3	7.5	7.3
March .....	8.3	8.1	8.2	8.1	8.1
April .....	7.6	7.5	7.7	7.8	7.9
May .....	8.0	8.1	8.4	8.1	8.3
June .....	8.0	8.0	8.3	7.9	8.2
July .....	8.8	8.8	9.2	8.9	9.2
August .....	9.1	9.3	9.3	9.0	9.2
September .....	8.4	8.6	8.6	8.3	8.6
October .....	8.4	8.5	8.5	8.5	8.6
November .....	8.4	8.4	8.1	8.3	8.0
December .....	8.8	8.5	7.8	8.7	8.6

Nationwide, the burglary volume rose 3 percent in 1991 over the 1990 total. By population group, increases were registered in all city groupings except cities with populations of 1 million or more, which showed a 2-percent decline. (See Table 12.)

Geographically, three of the four regions of the United States reported increases in burglary volumes during 1991 as compared to 1990. The increases were 6 percent in the Midwestern States, 4 percent in the Western States, and 2 percent in the Southern States. The only decrease in the burglary volume occurred in the Northeastern States with a 1-percent decline.

Longer term national trends show burglary down 2 percent from the 1987 volume and 8 percent below the 1982 level.

**Rate**

A burglary rate of 1,252 per 100,000 inhabitants was registered nationwide in 1991. The rate rose 1 percent over 1990 but was 16 percent below the 1982 rate. In 1991, for

every 100,000 in population, the rate was 1,368 in the metropolitan areas, 1,074 in the cities outside metropolitan areas, and 708 in the rural counties. (See Table 2.)

Regionally, the burglary rate was 1,498 in the Southern States, 1,324 in the Western States, 1,037 in the Midwestern States, and 1,010 in the Northeastern States. A comparison of 1990 and 1991 rates showed increases of 5 percent in the Midwest and 2 percent in the West. The South's burglary rate showed no change from the previous year, while in the Northeast, a 1-percent decrease was reported.

**Nature**

Two of every 3 burglaries in 1991 were residential in nature. Seventy percent of all burglaries involved forcible entry, 23 percent were unlawful entries (without force), and the remainder were forcible entry attempts. Offenses for which time of occurrence was reported were evenly divided between day and night.

Burglary victims suffered losses estimated at \$3.9 billion in 1991, and the average dollar loss per burglary was \$1,246. The average loss for residential offenses was \$1,281, while for nonresidential property, it was \$1,180. (See Table 23.)

Both residential and nonresidential burglary volumes showed increases of 2 percent from 1990 to 1991.

**Law Enforcement Response**

Geographically in 1991, a 13-percent clearance rate was recorded for burglaries brought to the attention of law enforcement agencies across the country. In the South, the clearance rate was 15 percent; in the Northeast, 14 percent, in the West, 13 percent; and in the Midwest, 11 percent.

Rural county law enforcement cleared 16 percent of the burglaries in their jurisdictions. Agencies in suburban counties cleared 14 percent, and those in cities, 13 percent.

Adults were involved in 81 percent of all burglary offenses cleared; the remaining 19 percent involved only young people under 18 years of age. Persons under age 18 accounted for 18 percent of the burglary clearances in cities, 20 percent of those in rural counties, and 23 percent of those in suburban counties. The highest degree of juvenile involvement was recorded in the Nation's smallest cities (under 10,000 in population) where young persons under 18 years of age accounted for 25 percent of the clearances. (See Table 28.)

# BURGLARY

CHART 2.19  
VARIATION FROM MONTHLY AVERAGE  
1991

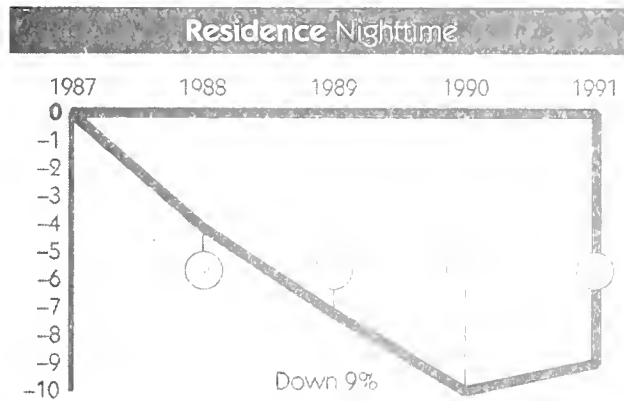

CHART 2.20  
PERCENT CHANGE FROM 1987

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary for which an estimated 436,500 arrests were made in 1991. Arrest trends between 1990 and 1991 show total burglary arrests were up 1 percent. Arrests of persons under 18 years of age showed an increase of 4 percent, while those of adults registered no change. For the same 2-year time period, total burglary

arrest trends showed no change in cities, a 5-percent increase in suburban counties, and a 10-percent upswing in rural counties.

Ninety-one percent of the burglary arrestees during 1991 were males, and 65 percent of the total were under 25 years of age. Among all burglary arrestees, whites accounted for 69 percent, blacks for 29 percent, and other races for the remainder.

## LARCENY-THEFT

### DEFINITION

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

### TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
1990 .....	7,945,670	3,194.8
1991 .....	8,142,228	3,228.8
Percent change .....	+2.5	+1.1

Estimated at 8.1 million offenses during 1991, larceny-thefts comprised 55 percent of the Crime Index total and 63 percent of the property crimes. Similar to the experience in previous years, larceny-thefts were recorded most often during the month of August and least frequently in February.

When viewed geographically, the Southern States, the most populous, recorded 38 percent of the larceny-theft total. The Midwest and Western States each registered 23 percent; and the Northeastern States, 16 percent. (See Table 4.)

**Table 2.26—Larceny-Theft by Month, 1987-1991**

[Percent of annual total]					
Months	1987	1988	1989	1990	1991
January .....	7.6	7.6	8.0	8.2	7.8
February .....	7.5	7.5	7.2	7.4	7.5
March .....	8.3	8.2	8.2	8.2	8.2
April .....	8.0	7.8	8.0	7.9	8.1
May .....	8.2	8.3	8.6	8.3	8.4
June .....	8.5	8.5	8.7	8.3	8.5
July .....	9.1	9.0	9.2	8.9	9.2
August .....	9.2	9.5	9.5	9.1	9.3
September .....	8.4	8.5	8.3	8.2	8.3
October .....	8.6	8.7	8.6	8.7	8.7
November .....	8.1	8.2	8.0	8.1	7.9
December .....	8.4	8.3	7.7	8.4	8.2

Compared to 1990, the 1991 volume of larceny-thefts increased 2 percent in the Nation and in all cities collectively. The suburban and rural counties also showed increases, 4 percent and 5 percent, respectively.

Regionally, volume upswings of 3 percent were recorded in both the Midwest and the Southern States. The Western States registered a 2-percent increase, while the Northeastern States showed no change.

The 5- and 10-year national trends indicated larceny was up 9 percent over the 1987 total and 14 percent above the 1982 level.

**Rate**

The 1991 larceny-theft rate was 3,229 per 100,000 United States inhabitants. The rate was 1 percent higher than in 1990 and 5 percent above the 1987 and 1982 levels. The 1991 rate was 3,560 per 100,000 inhabitants of metropolitan areas; 3,647 per 100,000 population in cities outside metropolitan areas; and 1,059 per 100,000 people in the rural counties. (See Table 2.)

Regionally, the rate in the Midwest was 3,082 per 100,000 inhabitants, an increase of 2 percent over the previous year. The South's 1991 rate of 3,518 was up 1 percent, while the rates per 100,000 inhabitants of 2,598 in

the Northeast and 3,522 in the West showed no change from 1990 levels.

**Nature**

During 1991, the average value of property stolen due to larceny-theft was \$478, down slightly from \$480 in 1990. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was \$3.9 billion for the year. This estimated dollar loss is considered conservative since many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention. Losses in 24 percent of the thefts reported to law enforcement in 1991 ranged from \$50 to \$200, while in 36 percent, they were over \$200.

Losses of goods and property reported stolen as a result of pocket-picking averaged \$366; purse-snatching, \$280; and shoplifting, \$104. Thefts from buildings resulted in an average loss of \$788; from motor vehicles, \$544; and from coin-operated machines, \$139. The average value loss due to thefts of motor vehicle accessories was \$305 and for thefts of bicycles, \$233. (See Table 23.)

Thefts of motor vehicle parts, accessories, and contents made up the largest portion of reported larcenies—37 percent. Also contributing to the high volume of thefts were shoplifting, accounting for 16 percent; thefts from buildings, 14 percent; and bicycle thefts, 6 percent. The remainder was distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and all other types of larceny-thefts. Table 2.27 presents the distribution of larceny-theft by type and geographic region.

**Table 2.27—Larceny Analysis by Region, 1991**

[Percent distribution]					
	United States Total	North-eastern States	Mid-western States	Southern States	Western States
Total <sup>1</sup> .....	100.0	100.0	100.0	100.0	100.0

CHART 2.25

## Law Enforcement Response

Twenty percent of the reported larceny-thefts were cleared nationwide during 1991. Cities collectively recorded a 21-percent clearance rate, with the highest rate, 25 percent, reported by law enforcement agencies in cities from 10,000 to 24,999 in population. Suburban and rural counties recorded 17-percent and 18-percent clearance rates, respectively.

In 1991, law enforcement agencies in the Western States cleared 22 percent of the larceny offenses brought to their attention, while the remaining regions each recorded 1991 clearance rates of 20 percent. (See Table 26.)

Twenty-three percent of the larceny-theft clearances nationally and in cities involved only offenders under 18 years of age. Twenty-four percent of those in suburban counties and 18 percent of those in rural counties were accounted for by persons in this age group.

Between 1990 and 1991, the total number of persons arrested as well as male and female arrests for larceny-theft

increased 2 percent. During this same period, adult arrests were up 1 percent, and those of persons under 18 years of age increased 5 percent.

Considering a longer timeframe, larceny-theft arrests rose 10 percent for the 5-year period, 1987-1991. Arrests of adults were up 11 percent, and of juveniles, up 8 percent. During this 5-year timespan, male and female arrests rose 9 and 12 percent, respectively.

Larceny-theft not only comprised the largest portion of Crime Index offenses reported to law enforcement, but this offense also accounted for 53 percent of the arrests for Index crimes and 71 percent of those for property crimes in 1991. Forty-four percent of the larceny arrests were of persons under 21 years of age, and 30 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1991, comprised 32 percent of all larceny-theft arrestees.

Whites accounted for 67 percent of the total larceny-theft arrestees, blacks for 31 percent, and all other races for the remainder.

## MOTOR VEHICLE THEFT

### DEFINITION

Defined as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

### TREND

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
<i>1990</i> .....	<i>1,635,907</i>	<i>657.8</i>
<i>1991</i> .....	<i>1,661,738</i>	<i>659.0</i>
<i>Percent change</i> .....	<i>+1.6</i>	<i>+.2</i>

An estimated total of 1,661,738 thefts of motor vehicles occurred in the United States during 1991. These offenses comprised 13 percent of all property crimes. The regional distribution of motor vehicle thefts showed 32 percent of the volume was in the Southern States, 26 percent in the Western States, 24 percent in the Northeastern States, and 18 percent in the Midwestern States.

The 1991 monthly figures show that the greatest number of motor vehicle thefts was recorded during the month of August, while the lowest count was in February.

**Table 2.28—Motor Vehicle Theft by Month, 1987-1991**

[Percent of annual total]

Months	1987	1988	1989	1990	1991
January .....	7.9	8.0	8.3	8.5	8.3
February .....	7.5	7.6	7.3	7.6	7.5
March .....	8.4	7.9	8.1	8.4	8.2
April .....	7.9	7.4	7.5	7.9	7.8
May .....	8.0	7.8	8.0	8.1	8.1
June .....	8.1	8.0	8.2	8.1	8.2
July .....	8.8	8.8	8.8	8.8	8.7
August .....	9.0	9.4	9.0	8.8	8.9
September .....	8.4	8.7	8.5	8.4	8.3
October .....	8.8	9.0	9.0	8.8	8.7
November .....	8.5	8.7	8.7	8.3	8.5
December .....	8.7	8.7	8.5	8.4	8.8

The number of motor vehicle thefts rose 2 percent nationally from 1990 to 1991. During the same period, the Nation's cities overall experienced a 1-percent increase and the suburban counties a 3-percent rise, while rural counties showed a decrease of less than 1 percent.

Geographically, three regions experienced motor vehicle theft increases, while the Northeastern Region showed a 2-percent decline. (See Table 4.)

The accompanying chart shows that the volume of motor vehicle thefts in 1991 increased 29 percent over the 1987 volume.

## Rate

The 1991 national motor vehicle theft rate—659 per 100,000 people—showed virtually no change from the rate in 1990. The rate was 24 percent higher than in 1987 and 44 percent above the 1982 rate.

For every 100,000 inhabitants living in MSAs, there were 803 motor vehicle thefts reported in 1991. The rate in cities outside metropolitan areas was 233 and in rural counties, 120. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem. For every 100,000 inhabitants in cities with populations over 250,000, the 1991 motor vehicle theft rate was 1,681. The Nation's smallest cities, those with fewer than 10,000 inhabitants, recorded a rate of 257 per 100,000.

Among the regions, the motor vehicle theft rates ranged from 791 per 100,000 people in the Western States to 507 in the Midwestern States. The Northeastern States' rate was 795 and the Southern States' rate, 603. All regions except the Northeastern States registered rate increases from 1990 to 1991. (See Table 4.)

An estimated average of 1 of every 117 registered motor vehicles was stolen nationwide during 1991. Regionally, this rate was greatest in the Northeast where 1 of every 84 motor vehicles registered was stolen. The other three regions reported lesser rates—1 per 101 in the West, 1 per 127 in the South, and 1 per 167 in the Midwest.

## Nature

During 1991, the estimated value of motor vehicles stolen nationwide was nearly \$8.3 billion. At the time of theft, the average value per vehicle stolen was \$4,983.

Eighty percent of all motor vehicles reported stolen during the year were automobiles, 15 percent were trucks or buses, and the remainder were other types.

**Table 2.29—Motor Vehicle Theft, 1991**

[Percent distribution by region]

Region	Total <sup>1</sup>	Autos	Trucks and buses	Other vehicles
Total .....	100.0	79.7	14.7	5.6
Northeastern States .....	100.0	92.7	4.4	2.9
Midwestern States .....	100.0	83.0	10.5	6.5
Southern States .....	100.0	74.7	19.0	6.3
Western States .....	100.0	71.4	21.9	6.8

<sup>1</sup>Because of rounding, percentages may not add to totals.

# MOTOR VEHICLE THEFT

CHART 2.26  
VARIATION FROM MONTHLY AVERAGE  
**1991**

CHART 2.27  
PERCENT CHANGE FROM 1987

## Law Enforcement Response

Law enforcement agencies nationwide recorded a 14-percent motor vehicle theft clearance rate for 1991. Those in cities cleared 13 percent; those in suburban counties cleared 16 percent; and rural county agencies cleared 33 percent.

Regional clearance percentages for motor vehicle theft were 17 percent in the Southern States, 15 percent in the Midwestern States, 13 percent in the Western States, and 10 percent in the Northeastern States.

Persons in the under-18 age group alone accounted for 23 percent of the motor vehicle thefts cleared both nationally and in cities. They comprised 22 percent of the clearances in the suburban counties and 20 percent of those in the rural counties.

During 1991, law enforcement agencies nationwide made an estimated 207,700 arrests for motor vehicle theft.

Males accounted for 90 percent of the persons arrested for motor vehicle theft. Fifty-nine percent of the arrestees were white, 39 percent were black, and the remainder were of other races.

A large proportion of motor vehicle theft arrestees was accounted for by the younger segment of the population. In 1991, 62 percent of all persons arrested for this offense were under 21 years of age, and those under 18 comprised 44 percent of the total. Between 1990 and 1991, arrests of persons under age 18 decreased less than 1 percent. Within this age range, arrests of males decreased 1 percent, while those of females were up 4 percent.

Total motor vehicle theft arrests were down 2 percent and adult arrests declined 4 percent in 1991 from the previous year. Overall arrests for this offense were 23 percent higher in 1991 than in 1987 and 61 percent above the 1982 level.

## **ARSON**

### **DEFINITION**

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

A total of 99,784 arson offenses was reported by 11,845 law enforcement agencies across the country; these agencies furnished from 1 to 12 months of reports during 1991. Of these reporting agencies, 11,706 provided the detailed information—type of structure, estimated monetary value of the property damaged, etc.—from which the tables on the accompanying pages were tabulated. Further information regarding arson offenses and trends is presented in Tables 12 through 15 and arson clearances in Tables 25 through 28. Since only 8,963 agencies covering 71 percent of the United States population submitted reports for all 12 months of the year, the data user should be aware that, while conservative indicators, the figures do not represent the Nation's total arson experience.

The number of arson offenses reported nationally and in suburban counties increased 1 percent in 1991 as compared to the 1990 total. Counts for the Nation's cities ranged from an 8-percent decline in cities with populations over 1 million to a 7-percent increase in those with 250,000 to 499,999 inhabitants. The rural counties registered a decline of 3 percent. (See Table 12.)

Geographically, arson increased in the Midwest and West by 1 percent and in the South by 2 percent. A 2-percent decrease was recorded in the Northeast.

By property type nationally, the number of arsons of structures rose less than 1 percent. Those of mobile property increased 2 percent, and of all other property rose 4 percent. (See Table 15.)

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures during the collection's relatively limited timespan. It is expected that year-to-year statistical comparability will improve as collection continues.

**Table 2.30—Arson Rate, Population Group, 1991**

[8,963 agencies; 1991 estimated population 179,673,000; rate per 100,000 inhabitants]

Group	Rate
Total .....	48.3
Total cities .....	56.0
Group I (cities 250,000 and over) .....	89.8
(cities 1,000,000 and over) .....	97.4
(cities 500,000 to 999,999) .....	74.2
(cities 250,000 to 499,999) .....	92.0
Group II (cities 100,000 to 249,999) .....	66.3
Group III (cities 50,000 to 99,999) .....	45.6
Group IV (cities 25,000 to 49,999) .....	37.0
Group V (cities 10,000 to 24,999) .....	27.9
Group VI (cities under 10,000) .....	29.0
Suburban counties .....	35.5
Rural counties .....	22.1
Suburban area .....	33.1

## Rate

Since population coverage for arson data is lower than for the other Crime Index offenses, arson rates per 100,000 inhabitants are tabulated independently. Based only on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the 1991 rates are shown in the accompanying table.

The rates ranged from 97 per 100,000 inhabitants in cities with populations over 1 million to 22 per 100,000 rural county inhabitants. The suburban counties and all cities collectively recorded rates of 36 and 56 per 100,000 inhabitants, respectively. Overall, the 1991 national arson rate was 48 per 100,000 population.

Regionally, the highest arson rate was registered in the Western States with 56 offenses per 100,000 population. Following were the Northeastern and Southern States with a rate of 46 per 100,000, and the Midwestern States with 44 per 100,000.

## Nature

As in previous years, structures were the most frequent targets of arsonists in 1991 and comprised 54 percent of the reported incidents. Twenty-seven percent of the arsons were directed at mobile property (motor vehicles, trailers, etc.), while other types of property (crops, timber, etc.) accounted for 19 percent.

**Table 2.31—Arson, Type of Property, 1991**

[11,706 agencies; 1991 estimated population 195,914,000]

Property classification	Number of offenses	Percent distribution <sup>1</sup>
Total .....	86,147	100.0
Total structure .....	46,478	54.0
Single occupancy residential .....	20,233	23.5
Other residential .....	8,062	9.4
Storage .....	4,384	5.1
Industrial/manufacturing .....	750	.9
Other commercial .....	5,226	6.1
Community/public .....	4,701	5.5
Other structure .....	3,122	3.6
Total mobile .....	23,595	27.4
Motor vehicles .....	21,917	25.4
Other mobile .....	1,678	1.9
Other .....	16,074	18.7

<sup>1</sup>Because of rounding, percentages may not add to totals.

Residential property was involved in 61 percent of the structural arsons during the year, with 44 percent of such offenses directed at single-occupancy dwellings. Nineteen percent of all targeted structural property was either uninhabited or abandoned at the time the arson occurred.

Motor vehicles comprised 93 percent of all mobile property at which arsons were directed.

Table 2.32—Arson, Structures Not in Use, 1991

[11,706 agencies; 1991 estimated population 195,914,000]

Type of structure	Number of offenses	Percent not in use
Total	46,478	19.2
Single occupancy residential	20,233	23.5
Other residential	8,062	13.9
Storage	4,384	23.7
Industrial/manufacturing	750	21.5
Other commercial	5,226	13.4
Community/public	4,701	8.4
Other structure	3,122	23.5

The monetary value of property damaged due to reported arsons averaged \$11,980 per incident in 1991. The overall average for all types of structures was \$19,763. While industrial/manufacturing property was the structural classification with the lowest reported number of offenses, it showed the highest average loss—\$84,942. Mobile properties averaged \$4,202 per incident, and other targets averaged \$895.

Table 2.33—Arson, Monetary Value of Property Damaged, 1991

[11,706 agencies; 1991 estimated population 195,914,000]

Property classification	Number of offenses	Average damage
Total	86,147	\$11,980
Total structure	46,478	19,763
Single occupancy residential	20,233	13,602
Other residential	8,062	12,964
Storage	4,384	12,388
Industrial/manufacturing	750	84,942
Other commercial	5,226	43,730
Community/public	4,701	36,436
Other structure	3,122	6,712
Total mobile	23,595	4,202
Motor vehicles	21,917	3,920
Other mobile	1,678	7,884
Other	16,074	895

Law Enforcement Response

The national 1991 arson clearance rate was 16 percent. Agencies in cities with fewer than 10,000 inhabitants showed the highest rate, clearing 25 percent of the arson offenses brought to their attention. Rural county law enforcement agencies cleared 22 percent; those in suburban counties, 18 percent; and in cities, 15 percent. (See Table 2.5.)

Regionally, the Southern States recorded a clearance rate of 21 percent; the Western States, 16 percent; the Midwestern States, 13 percent; and the Northeastern States, 12 percent.

Forty percent of all 1991 arson clearances involved only young people under age 18, a higher percentage of juvenile involvement than for any other Index crime. Persons in

this age group accounted for 38 percent of structural arson clearances, 23 percent of the clearances for arsons of mobile property, and 58 percent of those of all other property.

Table 2.34—Arson Offenses Cleared by Arrest,<sup>1</sup> 1991

[11,706 agencies<sup>2</sup>; 1991 estimated population 195,914,000]

Property classification	Number of offenses	Percent cleared by arrest
Total	86,147	18.0
Total structure	46,478	22.0
Single occupancy residential	20,233	22.1
Other residential	8,062	22.7
Storage	4,384	18.3
Industrial/manufacturing	750	14.0
Other commercial	5,226	14.9
Community/public	4,701	36.2
Other structure	3,122	17.0
Total mobile	23,595	9.2
Motor vehicles	21,917	8.8
Other mobile	1,678	14.6
Other	16,074	19.7

<sup>1</sup>Includes offenses cleared by exceptional means.

<sup>2</sup>To be included in this table, it was necessary that arson clearances be reported by property classification.

By population grouping, juveniles were the offenders in 42 percent of the city arson clearances, 38 percent of those in suburban counties, and 25 percent of those in the rural counties.

The accompanying tables show clearance data only for those 11,706 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (36 percent) was recorded for offenses in which community or public structures were involved, while the lowest rate (9 percent) was registered for motor vehicles.

Table 2.35—Arson Offenses Cleared by Arrest<sup>1</sup> of Persons under 18 Years of Age, 1991

[11,706 agencies<sup>2</sup>; 1991 estimated population 195,914,000]

Property classification	Total clearances	Percent under 18
Total	15,548	40.0
Total structure	10,221	38.2
Single occupancy residential	4,473	31.4
Other residential	1,830	30.6
Storage	801	43.9
Industrial/manufacturing	105	35.2
Other commercial	781	32.4
Community/public	1,700	60.9
Other structure	531	49.3
Total mobile	2,167	22.5
Motor vehicles	1,922	20.4
Other mobile	245	39.2
Other	3,160	57.5

<sup>1</sup>Includes offenses cleared by exceptional means.

<sup>2</sup>To be included in this table, it was necessary that arson clearances be reported by property classification.

The estimated number of arrests for arson during 1991 totaled 20,000. Forty-seven percent of the arrestees were under 18 years of age and 65 percent were under 25. Males comprised 87 percent of all arson arrestees. Seventy-seven percent of those arrested were white, 21 percent were black, and the remainder were of other races.

Trends for 1990 versus 1991 show arson arrests increased 2 percent nationwide and 13 percent in suburban counties. The Nation's cities experienced a 1-percent rise, whereas rural counties registered a 2-percent decrease.

Nationwide, arrests of juveniles were up 11 percent, while adult arrests showed a 4-percent decrease from 1990 to 1991. During the same period, male arrests for arson were up 3 percent and female arrests showed virtually no change.

The 1991 arson arrest total for all ages was 6 percent higher than the 1987 level but 6 percent lower than in 1982.

# Crime Index Tabulations

This Section's tabular portions present data on crime in the United States as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses. Also furnished in the following tables are national averages for the value of property stolen in connection with Crime Index offenses; further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications; information on the types of weapons used; and data on the type and value of property stolen and recovered.

Although the total number of crimes occurring throughout the Nation is unknown, information on those reported to law enforcement gives a reliable indication of criminal activity. In reviewing the tables in this report, it must be remembered, however, that many factors can cause the volume and type of crime to vary from place to place. Even though population, one of these factors, is used in computing crime rates, all communities are affected to some degree by seasonal or transient populations. Since counts of current, permanent population are used in their construction, crime rates do not account for short-term population variables, such as an influx of day workers, tourists, shoppers, etc. A further discussion of various factors contributing to the amount of crime in a given area is shown on page v of this publication.

National data can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It

is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

National estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past two decades are set forth in Table 1, "Index of Crime, United States, 1972-1991."

Table 2, "Index of Crime, United States, 1991," shows current year estimates for MSAs, rural counties, and cities and towns outside metropolitan areas. See Appendix III for the definitions of these community types.

Provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1991," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to consider each region's proportion of the total United States population. For example, although the Southern States accounted for the largest volume of Crime Index offenses in 1991, they also represented the greatest regional population.

## Note

*The collection of statistics on arson as a Crime Index offense began in 1979. However, 1991 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 8 through 11. Two-year arson trends are shown in Tables 12 through 15.*

**Table 1.—Index of Crime, United States, 1972-1991**

<sup>1</sup>Populations are Bureau of the Census provisional estimates as of July 1, except 1980 and 1990 which are the decennial census counts.

<sup>2</sup>Because of rounding, the offenses may not add to totals.

<sup>3</sup>Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

<sup>4</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

All rates were calculated on the offenses before rounding.

Data for 1991 were not available for the State of Iowa; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 377 for details.

<sup>1</sup>Populations are Bureau of the Census provisional estimates as of July 1, 1991, and are subject to change.

<sup>2</sup>Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting, and crime rates.

Data for 1991 were not available for the State of Iowa, therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 377 for details.

Table 3.—Index of Crime, Regional Offense and Population Distribution, 1991

<sup>1</sup>Populations are Bureau of the Census provisional estimates as of July 1, 1991 and are subject to change; 1990 are decennial census counts.<sup>2</sup>Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.<sup>4</sup>Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1990 and 1991 forcible rape totals for Illinois were estimated using the national rate of forcible rapes when grouped by like agencies. See "Offense Estimation," page 377 for details.<sup>5</sup>Data for 1991 were not available for the State of Iowa, therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 377 for details.<sup>6</sup>Includes offenses reported by the Zoological Police.<sup>7</sup>The 1991 Bureau of Census population estimate for Puerto Rico was not available prior to publication, therefore, no population or rates per 100,000 inhabitants are provided. Offense totals are based on all reporting agencies and estimates for unreported areas.

<sup>1</sup>Although arson data were included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>Includes offenses reported by the Zoological Police.

<sup>5</sup>Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1991 forcible rape totals for Illinois were estimated using the national rate of forcible rapes when grouped by like agencies. Therefore, only the state total is shown. See "Offense Estimation," page 377 for details.

<sup>6</sup>Data for 1991 were not available for the State of Iowa; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 377 for details.

<sup>7</sup>The 1991 Bureau of Census population estimate for Puerto Rico was not available prior to publication; therefore, no population or rates per 100,00 inhabitants are provided.

<sup>1</sup>Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Arson data for individual cities are shown in Table 8.

<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery and aggravated assault.

<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore the figures were excluded from the forcible rape, violent crime, and Crime Index total categories.

<sup>5</sup>Aggravated assault figures are not comparable to prior years due to a change in reporting procedures.

<sup>6</sup>Data for 1991 were not available for the State of Iowa. The area actually reporting includes only the Nebraska agencies indicated.

<sup>7</sup>The 1991 Bureau of the Census population estimates for the individual Puerto Rico MSA's were not available prior to publication; therefore no population or rates per 100,000 inhabitants are provided.

Table 7.—Offense Analysis, United States, 1987-1991

\$50 to \$200 .....	1,958,098	1,952,763	1,928,809	1,893,021	1,930,465
Under \$50 .....	2,983,924	3,073,826	3,163,526	3,212,017	3,295,483
Motor Vehicle Theft .....	1,288,700	1,432,900	1,564,800	1,635,900	1,661,700

Because of rounding, offenses may not add to totals.  
Data for 1991 were not available for the State of Iowa, therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 377 for details.

**Table 8.—Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1991**

\* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson

City by State	Population	Crime Index total	Modified* Crime Index total	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

\*Aggravated assault figures are not comparable to prior years due to a change in reporting procedures.

<sup>2</sup>Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

<sup>3</sup>Data for 1991 were not available for the State of Iowa; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 377 for details.

<sup>4</sup>1991 arson data are not comparable to prior years.

<sup>5</sup>1991 data are not comparable to prior years.

**Table 9.—Number of Offenses Known to the Police, Universities and Colleges, 1991**

\* Arson is shown only if 12 months of arson data were received. Leaders ( ) indicate zero data.

University/College	Student enrollment <sup>1</sup>	Violent <sup>2</sup> crime total	Violent Crime				Property <sup>3</sup> crime total	Property Crime			
			Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault		Burglary	Larceny-theft	Motor vehicle theft	Arson*

<sup>1</sup>The student enrollment figures provided by the United States Department of Education are for 1990, the most recent year available. The enrollment figure includes full-time and part-time students. See Appendix I for details.

<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>Student enrollment figures were not available.

<sup>5</sup>Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape and violent crime total categories.

<sup>6</sup>Data for 1991 were not available for the State of Iowa, therefore it was necessary that their crime counts be estimated. See "Offense Estimation," page for 377 details.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

**Table 10.—Number of Offenses Known to the Police, Suburban Counties, 1991**

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]

\* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime IndexSee footnotes at end of table. offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

\*Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

\*Data for 1991 were not available for the Indiana State Police. The figures listed are only those reported by the county sheriffs' department.

\*Complete data for 1991 were not available for the State of Iowa, therefore, it was necessary that their crime figures be estimated. See "Offense Estimation," page 377 for details.

**Table 11.—Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1991**

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]  
 \* Arson is shown only if 12 months of arson data were received. Leaders (.) indicate zero data. The Modified Crime Index total is the sum of the Crime IndexSee footnotes at end of table  
 offenses, including arson

\*Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

\*Complete data for 1991 were not available for the Indiana State Police. The figures listed are only those reported by the county sheriffs' departments.

\*Data for 1991 were not available for the State of Iowa, therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," page 377 for details.

<sup>1</sup>The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. It is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>Includes state police agencies with no county breakdown.

<sup>5</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1991 were not available for the State of Iowa. See "Offense Estimation," page 377 for details.

<sup>1</sup>The number of agencies used in arson trends are less than used in compiling trends for other Crime Index offenses. It is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>Crime offenses include sheriffs' and county law enforcement agencies. State police offenses are not included.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1991 were not available for the State of Iowa. See "Offense Estimation," page 377 for details.

Table 15.—Crime Trends, Offenses Known Breakdown, Population Group, 1990-1991

[1991 estimated population]

Population group	Forcible rape		Robbery			Aggravated assault			Burglary		Motor vehicle theft			Arson¹

Number of offenses known ..	4,061,801		389,274	3,672,527	4,383	28,451	101,884	254,556	871,739	2,431,200	369,588	
Rate .....	4,651.0		445.7	4,205.3	5.0	32.6	116.7	291.5	998.2	2,783.9	423.2	

<sup>1</sup>Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 54 of this publication.

<sup>2</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>3</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>4</sup>Includes state police agencies with no county breakdown.

<sup>5</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. See Appendix I for details.

Complete data for 1991 were not available for the State of Iowa. See "Offense Estimation," page 377 for details.

Table 19.—Crime Rates, Offenses Known Breakdown, Population Group, 1991—Continued

Population group	Forcible rape		Robbery			Aggravated assault				Burglary			Motor vehicle theft				Arson <sup>1</sup>		
	Rape by force	Assault to rape— attempts	Firearm	Knife or cutting instru- ment	Other weapon	Strong- armed	Firearm	Knife or cutting instru- ment	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other
GROUP IV																			
581 cities, 25,000 to 49,999; population 20,274,000:																			
Number of offenses known		6,569	1,038	10,606	3,208	3,284	15,303	11,787	12,486	20,881	25,138	155,020	56,795	21,961	83,421	14,385	7,948		
Rate		32.4	5.1	52.3	15.8	16.2	75.5	58.1	61.6	103.0	124.0	764.6	280.1	108.3	411.5	71.0	39.2		
GROUP V																			
1,369 cities, 10,000 to 24,999; population 21,715,000:																			
Number of offenses known		5,601	909	6,356	2,011	2,158	9,366	9,384	10,671	16,056	23,468	134,520	51,740	19,480	58,566	11,749	6,778		
Rate		25.8	4.2	29.3	9.3	9.9	43.1	43.2	49.1	73.9	108.1	619.5	238.3	89.7	269.7	54.1	31.2		
GROUP VI																			
4,972 cities under 10,000; population 17,655,000:																			
Number of offenses known		3,734	664	2,996	1,030	923	4,589	5,475	6,979	9,929	24,578	95,925	46,923	14,065	32,962	7,428	5,702		
Rate		21.1	3.8	17.0	5.8	5.2	26.0	31.0	39.5	56.2	139.2	543.3	265.8	79.7	186.7	42.1	32.3		
SUBURBAN COUNTIES																			
1,012 agencies; population 41,512,000:																			
Number of offenses known		13,239	1,873	21,952	4,139	5,922	19,639	25,819	18,441	40,815	39,134	296,737	106,875	30,627	127,903	33,193	16,038		
Rate		31.9	4.5	52.9	10.0	14.3	47.3	62.2	44.4	98.3	94.3	714.8	257.5	73.8	308.1	80.0	38.6		
RURAL COUNTIES																			
2,109 agencies; population 22,389,000:																			
Number of offenses known		4,950	550	1,311	418	327	1,327	6,429	5,234	7,386	13,907	119,175	38,366	8,892	14,916	5,791	6,368		
Rate		22.1	2.5	5.9	1.9	1.5	5.9	28.7	23.4	33.0	62.1	532.3	171.4	39.7	66.6	25.9	28.4		
SUBURBAN AREA <sup>2</sup>																			
5,107 agencies; population 82,990,000:																			
Number of offenses known		23,231	3,486	37,527	8,468	10,713	40,538	42,594	35,684	70,897	84,475	545,685	209,621	68,544	268,151	57,986	30,917		
Rate		28.0	4.2	45.2	10.2	12.9	48.8	51.3	43.0	85.4	101.8	657.5	252.6	82.6	323.1	69.9	37.3		

<sup>1</sup>Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 54 of this publication.

<sup>2</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities, suburban cities and counties are also included in other groups.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. See Appendix I for details.

Complete data for 1991 were not available for the State of Iowa. See "Offense Estimation," page 377 for details.

Table 20.—Murder, State, Type of Weapon, 1991

State	Total murders <sup>1</sup>	Total firearms	Handguns	Rifles	Shotguns	Firearms (type unknown)	Knives or cutting instruments	Other weapons	Hands, fists, feet, etc.

## SECTION III

### Crime Index Offenses Cleared

For UCR purposes, law enforcement agencies clear or solve an offense when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Clearances recorded in 1991 may be for offenses which occurred in prior years. Several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one offense. Law enforcement agencies may clear a crime by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances allowing such clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to cooperate with prosecution after the offender has been identified; or the denial of extradition because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

Law enforcement agencies nationwide recorded a 21-percent Crime Index clearance rate for 1991. Collectively, 45 percent of violent crimes were cleared. Among the violent offenses, the rates were 67 percent for murder, 52 percent for forcible rape, 24 percent for robbery, and 57 percent for aggravated assault. Clearances for crimes against persons (murder, forcible rape, and aggravated assault) are generally higher as more intense investigative efforts are often given these offenses and witnesses are frequently available to identify the perpetrators.

The overall property crime clearance rate was 18 percent. Thirteen percent of the burglaries, 20 percent of the larceny-thefts, 14 percent of motor vehicle thefts, and 16 percent of arsons were cleared during the year.

When considering the Modified Crime Index total which includes arson, the overall clearance rate remained the same, 21 percent.

The highest total Crime Index clearance rates geographically were registered in the South and West, with 22 percent. Following were the Northeast and Midwest, each with 20 percent. For violent crime overall, the highest clearance rates were recorded in the South and the West, each with 48 percent. In the Northeast and Midwest, the

rates were 40 percent. Property crime clearance rates were 18 percent in the Midwest, South, and West and 17 percent in the Northeast.

By community type, city law enforcement agencies showed clearances for 21 percent of the Crime Index offenses brought to their attention. Those in suburban counties cleared 20 percent, and those in rural counties, 23 percent. Among the population groups, cities with 10,000 to 24,999 inhabitants registered the highest total Crime Index clearance rate, 26 percent. The highest violent crime clearance rates were recorded in the rural counties with 63 percent. Like Crime Index clearance rates, those for property crimes were highest for cities with populations from 10,000 to 24,999. (See Table 25.)

#### **Clearances Involving Only Persons under 18 Years of Age**

Involvement of juveniles in crime can be measured by the number of crimes in which they have been identified as the offenders. Even though no physical arrest has been made, a clearance by arrest is recorded when an offender under 18 years of age is cited to appear in juvenile court or before other juvenile authorities. Since the juvenile clearance percentages shown in this publication indicate only those offenses where no adults were involved, they should be considered a slight underestimation of juvenile involvement in crime. Juveniles (persons under 18 years of age) account for 26 percent of the United States population, according to 1991 Bureau of the Census estimates.

Nineteen percent of the Crime Index offenses cleared by law enforcement during 1991 involved only young people under age 18. Persons in this age group accounted for 11 percent of the violent crime clearances and 22 percent of those for property crimes. Murder showed the lowest percentage of juvenile involvement (8 percent), while the highest percentage was shown for arson (40 percent).

Geographically, the Midwestern States recorded the largest percentage of Crime Index offense involvement by the under-18 age group—22 percent. Juveniles alone were the offenders in 21 percent of the clearances in the Western States, 19 percent of those in the Southern States, and 15 percent of those in the Northeastern States.

<sup>1</sup>Includes offenses cleared by exceptional means.<sup>2</sup>The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.<sup>4</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.<sup>5</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups. Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1991 were not available for the State of Iowa. See "Offense Estimation," page 377 for details.

<sup>1</sup>Includes offenses cleared by exceptional means.

<sup>2</sup>The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>4</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>5</sup>Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1991 were not available for the State of Iowa. See "Offense Estimation," page 377 for details.

Table 27.—Offenses Known Breakdown and Percent Cleared by Arrest<sup>1</sup>, Population Group, 1991

[1991 estimated population]

Population Group	Forcible rape		Robbery			Aggravated assault			Burglary			Motor vehicle theft			Arson <sup>2</sup>					
	Rape by force	Assault to rape—attempts	Firearm	Knife or cutting instru-ment	Other weapon	Strong-armed	Firearm	Knife or cutting instru-ment	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other

<sup>1</sup>Includes offenses cleared by exceptional means.

<sup>2</sup>The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>4</sup>Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

<sup>5</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1991 were not available for the State of Iowa. See "Offense Estimation," page 377 for details.

# SECTION IV

## Persons Arrested

Primarily a gauge of law enforcement's response to crime, arrest counts also provide definitive data concerning the age, sex, and race of perpetrators. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time as, for example, during a local police campaign against residential burglary. While the practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies, those for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. The Program's procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

Nationwide, law enforcement agencies made an estimated 14.2 million arrests in 1991 for all criminal infractions except traffic violations. The highest arrest counts among the specific crime categories were for driving under the influence, 1.8 million; larceny-theft, 1.6 million; and simple assault and drug abuse violations, each 1 million. (See Table 29.)

When the overall arrest volume was related to the total United States population, the rate was 5,648 arrests per 100,000 inhabitants. Among the city population groupings, those with more than 250,000 inhabitants recorded the highest rate, 7,579, while those with populations from 10,000 to 24,999 recorded the lowest rate, 5,432. (See Table 31.) For suburban county agencies overall, the arrest rate was 4,210, and for rural county law enforcement, it was 3,851 per 100,000 inhabitants. Regionally, the arrest rates per 100,000 population ranged from 5,210 in the Midwest to 5,973 in the West. (See Table 30.)

Due to NIBRS conversion efforts and other reporting problems, no arrest data for Florida and Iowa law enforcement agencies were available for 1991. Therefore, tables showing the age, sex, or race of persons arrested contain no Florida and Iowa data. Arrest totals were, however, estimated for inclusion in Table 29, "Total Estimated Arrests, United States, 1991."

### Arrest Trends

The national total number of arrests for all offenses except traffic violations decreased 1 percent in 1991 as compared to the 1990 volume, while overall Index, violent, and property crime arrest totals each increased 2 percent. During the same time period, adult arrests for all offenses declined 2 percent, but slight increases were recorded in adult arrests for the violent, property, and Index crime

categories. Conversely, increases were recorded in the juvenile arrest volume, 1991 versus for 1990, total arrests, for Index crimes, for violent crimes, and property crimes. (See Table 36.)

Two-year trends in total arrests for city and suburban county agencies showed 2-percent decreases, 1991 over 1990, while rural county arrests were up 3 percent. (See Tables 44, 50, and 56.)

Over the 5-year period beginning in 1987, total arrests and adult arrests for all offenses were each up 10 percent and those of persons under 18 years of age rose 9 percent. (See Table 34.) Total Crime Index arrests as well as Index arrests of adults and juveniles increased 13 percent. During the same years, 1987-1991, total violent crime arrests increased 29 percent, and property crime arrests were up 9 percent.

For the decade, 1982-1991, arrests for all offenses were up 19 percent; Crime Index arrests, 18 percent; violent crime arrests, 43 percent; and property crime arrests, 12 percent.

The 1991 drug abuse violation arrest total was down 8 percent from the 1990 level, 7 percent higher than in 1987, and 56 percent higher than in 1982. The following table shows the types of drugs involved in violations resulting in arrests during 1991 by geographic region.

**Table 4.1—Arrests for Drug Abuse Violations, 1991**  
[Percent distribution]

	United States total	North-eastern States	Mid-western States	South-ern States	Western States

<sup>1</sup> Because of rounding, percentages may not add to totals.

### Age

Six percent of all persons arrested nationally in 1991 were under the age of 15; 16 percent were under 18; 30 percent were under 21; and 46 percent were under 25. Persons in the under-25 age group accounted for 47 percent of arrests in the cities, 42 percent of those in the suburban counties, and 39 percent of those in the rural counties.

Age distribution figures for persons arrested for Crime Index offenses showed 29 percent were under the age of 18;

43 percent, under 21; and 57 percent, under 25. The under-25 age group was also responsible for 48 percent of the violent crime arrests and 59 percent of property crime arrests in 1991.

Larceny-theft was the offense resulting in the most arrests of persons under age 18, while adults were most often arrested for driving under the influence. (See Table 38.)

Sex

Eighty-one percent of the persons arrested in the Nation during 1991 were males. (See Table 42.) They accounted for 78 percent of Index crime arrests, 88 percent of those for violent crimes, and 75 percent of the property crime arrests. Men were most often arrested for driving under the influence, which accounted for 13 percent of all male arrests.

As in past years, larceny-theft was the crime for which females were most often arrested. This single offense accounted for 78 percent of arrests of women for Index

crimes and 19 percent of all female arrests. Fifty-two percent of all female larceny-theft arrestees were under 25 years of age.

Two-year trends showed a 2-percent decrease in the number of male arrests from 1990 to 1991, while female arrests rose slightly for the same period. (See Table 37.) Arrests of males were up 9 percent and those of females up 16 percent for the 5-year period from 1987 to 1991. (See Table 35.)

Race

Race distribution figures for the total number of arrests in the United States during 1991 showed 69 percent of the arrestees were white, 29 percent were black, and the remainder were of other races. (See Table 43.) Whites accounted for 63 percent of the Index crime arrests, 54 percent of the arrests for violent crimes, and 66 percent of those for property crimes.

<sup>1</sup>Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

<sup>2</sup>Because of rounding, the percentages may not add to total.

<sup>3</sup>Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

<sup>4</sup>Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

<sup>5</sup>Includes arson.

Excludes central cities. Suburban cities and counties are included in other groups.

# SECTION V

## Juveniles and Violence

Nationwide, there is a growing concern over an escalation in juvenile delinquency, a perception supported by the unprecedented level of juvenile violence confronting the Nation. Historically, the youth of America has had proclivity toward property-related crimes such as motor vehicle theft, larceny, and arson. During the 1980s, however, crimes related to violence became a more significant component of juvenile crime, not only involving disadvantaged minority youth in urban areas but evident in all races, social classes, and lifestyles. In an effort to address this social phenomenon, this study examines the movement in juvenile violence from the mid-1960s to 1990.

Causal factors pertaining to juvenile violence are multifarious. Many social scientists believe that much of the violence reflects a breakdown of families, schools, and other societal institutions. Some studies suggest that 70 percent of juvenile offenders come from single-parent homes. Since 1950, the percentage of single-parent families in the United States has tripled. Moreover, this unprecedented rise in juvenile violence has coincided with a significant increase in the juvenile heroin/cocaine arrest rate, as well as a proliferation in illegal weapon usage. This report measures juvenile violence in terms of arrest rate trends for violent crimes (murder, forcible rape, robbery, and aggravated assault), drug abuse violations, and weapon law violations. Since a specific segment of the U.S. population (i.e., juveniles) is addressed, Uniform Crime Reporting (UCR) arrest statistics are used as an indicator of crime trends. The arrest statistics are based on data reported to the FBI's UCR Program by local law enforcement agencies.

For the purposes of this study, a juvenile is defined as a person between the ages 10 - 17. Arrest rates expressed per 100,000 in this study are, therefore, based on the population aged 10 - 17. This age group is viewed to be appropriate in that it accounts for over 98 percent of juvenile violent crime arrests. Consequently, a more definitive trend of juvenile violent crime can be established by omitting children (aged below 10).

### **Violent Crime**

In 1990, the Nation experienced its highest juvenile violent crime arrest rate, 430 per 100,000 juveniles (see Chart 5.1). The 1990 rate was 27 percent higher than the 1980 rate. As portrayed in Chart 5.2, both white and black arrest rates experienced substantial increases from 1965 to 1990. Of particular note is the upward trend that started in 1988 for both white and black youths, as well as the downward trend for those in the other-race category. Overall, for the period 1980 - 1990, the white juvenile violent crime arrest rate increased 44 percent, as compared

to a 19-percent increase for blacks and a 53-percent decline for others. With the exception of robbery, all violent crime categories showed significant increases in juvenile arrest rates during the past decade. In 1990, the juvenile violent crime arrest rate reached 1,429 per 100,000 black juveniles, five times that for white youths. The other-race category registered its lowest violent crime arrest rate in 1990 after peaking in 1978. A crime-by-crime analysis of each violent crime arrest rate follows. In conjunction with this analysis, there is also an examination of the arrest rate trends for juvenile drug abuse violations and weapon law violations.

### **Murder**

The Nation experienced an upsurge in the juvenile murder arrest rate for blacks during the 1980s as shown in Chart 5.4. This upward trend had a profound impact on the overall juvenile murder arrest rate (see Chart 5.3). Specifically, between 1980 and 1990, the arrest rate for this group increased 145 percent, while the rate for whites rose 48 percent and for other races, declined 45 percent. When considering the difference in the arrest rate for black and white juveniles, the black rate was 7.5 times that of whites in 1990. From a historical perspective, 1965 to 1990, the overall murder arrest rate for juveniles increased 332 percent, from 2.8 to 12.1. Another item of concern is that during the past decade, there has been a 79-percent increase in the number of juveniles who commit murders with guns. In 1990, nearly 3 of 4 juvenile murder offenders used guns to perpetrate their crimes. The juvenile arrest rate trends for weapon law violations and heroin/cocaine violations paralleled the trend for murder since 1980. Murder and illegal weapon usage have become a component of the illicit heroin/cocaine drug trade.

### **Forcible Rape**

The Nation's juvenile forcible rape arrest rate has more than doubled since 1965, from 10.9 to 21.9 in 1990. In more recent years, 1980 - 1990, the white arrest rate has increased dramatically faster than the black arrest rate, 86 percent versus 9 percent, although the black rate is significantly higher than the white rate (see Charts 5.5 and 5.6). The other racial group category experienced a 66-percent decline since 1980. In fact, this group's rate in 1965 was 27.9 as compared to 3.7 in 1990. The percent distribution for juvenile forcible rape arrestees in 1990 was 53 percent for whites, 46 percent for blacks, and 2 percent for others.

### **Robbery**

Robbery is the second most frequently committed violent offense, exceeded only by aggravated assault.

Consequently, it has the second highest arrest rate among violent crimes. After peaking in 1978 and declining during the middle 1980s, the juvenile robbery arrest rate in the Nation escalated as shown in Chart 5.7. The upward trend was led by a 54-percent increase in the white arrest rate from 1988 to 1990, when it reached 75 per 100,000, the highest rate for this group during the 26-year period under consideration, 1965-1990. The black arrest rate was 34 percent higher than in 1988 but was 16 percent below the 1980 rate. This was the only decrease experienced by black juveniles for any violent crime category during the decade. Moreover, black juveniles in 1990 constituted 63 percent of juvenile robbery arrests, the highest black percentage for any violent crime category. From a historical perspective, the other racial group category had a relatively high juvenile arrest rate for robbery; but in 1990, its rate decreased to the lowest rate among racial groups (see Chart 5.8).

### **Aggravated Assault**

Aggravated assault, the most voluminous violent crime, registered the highest juvenile arrest rate among violent offenses. Charts 5.9 and 5.10 reveal that the rate of juvenile arrests for aggravated assault has increased substantially for both white and black youths, particularly during the past decade. The arrest rate for these two groups increased 59 percent and 89 percent, respectively, from 1980 to 1990. Dissimilar to other violent crimes, the juvenile arrest rate trend for aggravated assault has undulated minimally since 1965. This would suggest that today's youth are more inclined to settle a dispute by engaging in a physical altercation. An exception to this trend was the arrest rate for the other-race category. For this group, the arrest rate declined 39 percent between 1980 and 1990. It now has the lowest aggravated assault arrest rate after peaking in 1978. It should be noted, however, that in terms of total impact, the other-race category represented only 2 percent of the arrests for this crime in 1990.

### **Drug Abuse Violations**

The pattern of drug abuse in the Nation changed dramatically during the 1980s (see Charts 5.11 through 5.14). Heroin/cocaine violations now represent the predominant drug arrest type for juveniles. A major repercussion of this development has been an extraordinary burden on the juvenile criminal justice system. There is a relationship between juvenile violence and the proliferating drug trade, particularly with regard to cocaine.

Prior to 1980, marijuana was the most abused illegal drug by juveniles for all racial groups. Juvenile marijuana arrest rates rose significantly from 1965 to the mid-1970s, as did those for synthetic drugs and nonnarcotic drugs. Rates for heroin/cocaine arrests were relatively low and rather stable prior to 1980. During the 1980s, however, there was a shift of historical proportion in juvenile arrest

rates for marijuana and heroin/cocaine. The marijuana juvenile arrest rate dropped dramatically, while there was an exponential increase in the heroin/cocaine rate. Specifically, between 1980 and 1990, the overall rate for juvenile heroin/cocaine arrests rose 713 percent. When considering this increase by race, the black arrest rate jumped 2,373 percent, followed by a 251-percent upswing for whites, and a 127-percent rise for other races. Conversely, the overall rate for marijuana arrests fell 66 percent. The decline was experienced by all racial groups. It can be suggested that the diverging trends established by these two drug types may not be short-lived. Juveniles will continue to play an instrumental role in the sale and possession of heroin/cocaine, particularly if the opportunity for monetary gain remains.

### **Weapon Law Violations**

In 1990, nationally there were 151 arrests per 100,000 juveniles for weapon law violations. This was the highest rate ever recorded. It is indicative of a surge in weapon violations by juveniles that commenced during the early 1980s. Both white and black juveniles are responsible for this increase (see Charts 5.15 and 5.16). The arrest rate for whites rose 58 percent between 1980 and 1990, and the black rate jumped 103 percent. The other-race category experienced a 48-percent decline. This group had the lowest arrest rate of any group in 1990, 30 per 100,000 juveniles. This is an interesting development when considering the fact that the other-race rate nearly equalled the black rate in the 1970s. An examination of the percent distribution by race for juvenile weapon law violations arrests in 1990 revealed that whites accounted for 62 percent, blacks for 36 percent, and other races the remainder. As mentioned earlier, the more recent arrest trend for juvenile weapon law violations paralleled the trends for murder and heroin/cocaine violations.

### **Summary**

The Nation is experiencing an unrivaled period of juvenile violent crime that began during the 1980s. Most juvenile arrest rates for crimes related to violence rose substantially between 1980 and 1990 as shown in Table 5.1. This was particularly true for both white and black youths. The following offenses exceeded or approached their highest juvenile arrest rate in 1990: murder, 12.1; forcible rape, 21.9; robbery, 156.2; aggravated assault, 240.4; heroin/cocaine, 168.1; weapon violations, 151.0. While there was a substantial decline in the arrest rates for the other-race category, arrests of persons in this group accounted for less than 2 percent of violent crime arrests. The decline in this racial category's arrest rates was primarily attributable to a large increase in the number of Asian juveniles. Historically, this group has been the least crime-prone group among juveniles.

# JUVENILE WEAPON VIOLATIONS ARREST RATES

United States 1965-1990

While the focus of this study has been at the national level, juvenile arrest data at the state level revealed that three of four states in the Nation experienced significant increases in their overall juvenile violent crime arrest rates between 1980 and 1990. These states covered all geographic regions, which would indicate that the surge in juvenile violent crime arrests has a broad base, not limited to a particular geographic area. Moreover, the juvenile violent crime arrest trend was consistent with the adult upward trend.

The recent increase in the juvenile arrest rate for crimes related to violence may be indicative of future trends when considering concomitant social/demographic trends. Final arrest statistics for 1991, which became available after this study was completed, show that the upward trend in juvenile violent crime continues. The population group 10-17 is projected to increase significantly between 1990 and 2000. This development may lead to further escalation in juvenile crimes/arrests. Similarly, it is widely believed that prevailing social conditions with regard to family stability,

education, and other societal institutions have an effect on the behavior of juveniles.

## SECTION VI

### Law Enforcement Personnel

The Nation's law enforcement community employed an average of 2.2 full-time officers for every 1,000 inhabitants as of October 31, 1991. Considering full-time civilians, the overall law enforcement employee rate was 3.1 per 1,000 inhabitants according to 12,805 city, county, and state police agencies reporting in 1991. These agencies collectively offered law enforcement service to a population of over 238 million, employing 535,629 officers and 199,883 civilians. A listing of reported full-time law enforcement officers and civilian employees by state is shown in Table 77.

Varying demographic and other jurisdictional characteristics greatly affect the requirements for law enforcement service from one locale to another. The needs of a community having a highly mobile or seasonal population, for example, may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly diverse throughout the Nation. In certain areas, sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. Likewise, the responsibilities of state police and highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate personnel for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

The law enforcement employee average for all cities nationwide in 1991 was 2.8 per 1,000 inhabitants. The Nation's smallest cities, those with fewer than 10,000 inhabitants, employed 3.3 employees per 1,000 population, while for the largest cities (over 250,000 population) the rate was 3.6 per 1,000. Rural and suburban counties

averaged full-time law enforcement employee rates of 3.8 and 3.6 per 1,000 population, respectively. (See Table 70.)

Regionally, the law enforcement employee rate was highest in the South, with 3.2, and lowest in the West, 2.4. (See Table 70.)

#### Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2.2 officers per 1,000 inhabitants. By population grouping, the rates ranged from 1.7 for cities with populations of 25,000 to 99,999 to 2.8 in cities with 250,000 or more inhabitants. Suburban county law enforcement agencies averaged 2.3 officers per 1,000 population, while agencies in rural counties averaged 2.5. (See Table 71.)

Geographically, the highest rates of officers to population were recorded in the Northeastern and Southern States where there were 2.4 officers per 1,000 inhabitants. Following were the Midwestern States with 2.1 and the Western States with 1.7.

Males comprised 91 percent of all sworn employees nationally. Ninety-three percent of the officers in rural counties, 91 percent of those in cities, and 88 percent in suburban counties were males.

#### Civilian Employees

Civilians made up 27 percent of the total United States law enforcement employee force in 1991. They represented 22 percent of the police employees in cities, 33 percent of those in rural counties, and 35 percent of the suburban county law enforcement strength. Thirty-six percent of all civilian employees were males.

#### Law Enforcement Officers Killed and Assaulted

Sixty-nine law enforcement officers were feloniously slain in the line of duty during 1991, four more than in the previous year. Accidents occurring while performing official duties claimed the lives of an additional 52 officers in 1991. The 1991 total for officers accidentally killed was the lowest since 1978, when the count was also 52.

Extensive data on line-of-duty deaths and assaults on city, county, state, and Federal officers can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted*.

# SECTION VII

## APPENDIX I

### Methodology

The information compiled by UCR contributors is forwarded to the FBI either directly from the local law enforcement agency or through a state-level UCR Program. Agencies submitting directly to the FBI are provided continuing guidance and support on an individual basis.

State-level UCR Programs are very effective intermediaries between local contributors and the FBI. Many of the 42 state Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law enforcement agencies within the state. Instead, information from local agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting mat-

ters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

#### Reporting Procedures

Based on records of all reports of crime received from victims, officers who discover infractions, or other sources, law enforcement agencies across the country tabulate the number of Crime Index or Part I offenses brought to their attention each month. Specifically, the crimes reported to the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond law enforcement control precludes the arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations. The age, sex, and race of arrestees are reported by crime category, both Part I and Part II. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. The number of full-time sworn and civilian personnel are reported annually, as of October 31.

#### Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for deviations

which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. When it is found that changes in crime reporting procedures or annexations are influencing the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and law enforcement personnel is maintained, and training sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook*, which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Since a good records system is essential for accurate crime reporting, the FBI also furnishes the *Manual of Law Enforcement Records*.

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program "Bulletin" are utilized. They address Program policy, as well as present information and instructional material, and are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the International Association of Chiefs of Police or the Committee on Uniform Crime Reporting of the National Sheriffs' Association.

#### **Offense Estimation**

Tables 1 through 5 and 7 of this publication contain statistics for the entire United States. Because not all law

enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies.

Unique estimation procedures were used to produce estimated 1985 through 1991 forcible rape figures for the state of Illinois. In mid-1984, gender-neutral sex offense legislation was passed in that state. As a result, forcible rape figures furnished by the state-level UCR Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rape totals are not shown in Tables 6 and 8 through 11, which present individual city, county, university/college, and MSA data for Illinois agencies. Since the data supplied were not comparable with those provided for other agencies across the country, the post-1984 forcible rape figures have been estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally.

Due to reporting problems at the state levels, no usable 1988 data were received for local law enforcement agencies in Florida and Kentucky. For Table 1 of this publication, 1988 offense totals for these two states were estimated. Previous valid annual totals, by population group, were updated for the states by applying percentage changes for each offense within each population group of the geographic division in which the state resides. The state totals were compiled from the sums of the population group estimates. Reporting recommenced for both states during 1989 and usable data have since been received.

This same procedure was used to estimate Iowa crime counts for 1991. Because of efforts to convert to the National Incident-Based Reporting System within that state, no summary totals for local law enforcement agencies could be generated.

#### **Crime Trends**

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable timeframes or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. Valid percent changes for 2-, 5-, and 10-year periods are presented in this book's tabular portions.

## Table Methodology

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 8 through 11, showing specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated on varied levels of submission. Unless consisting of estimates for the total United States population, each table in this publication shows the number of agencies reporting and the extent of population coverage.

Designed to assist the reader, this appendix explains the construction of many tabular presentations in the book. The following key refers to the columnar headings used throughout the appendix.

- Key: A) Column 1 shows the table numbers. Included are Tables 1 through 69, *Crime in the United States - 1991*.
- B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table.

- C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.
- D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1991 statistics are consistent with Table 2. Pre-1991 crime statistics may have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statistics represent July 1 provisional estimates for each year except 1980 and 1990, which are Bureau of the Census decennial census data (see App. III). Crime volume statistics are rounded to the nearest 10 for violent crime and the nearest 100 for property crime. Percent changes and rates are computed prior to rounding.	Represents an estimation of national reported crime activity from 1972 through 1991.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1991).	Statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1991, Bureau of the Census provisional estimates. See Appendix III for UCR population breakdowns.	Represents an estimation of national reported crime activity in 1991.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1991).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on July 1, 1991, Bureau of the Census provisional estimates (see App. III).	Represents the 1991 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months)	The 1991 statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1990 and 1991. Population statistics represent July 1 provisional estimates for 1991 and decennial census data for 1990 (see App. III).	Represents an estimation of reported crime activity for Index offenses at the: <ul style="list-style-type: none"> <li>1. national level</li> <li>2. regional level</li> <li>3. division level</li> <li>4. state level</li> </ul> Any comparison of UCR statistics should take into consideration demographic factors.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1991).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent 1991 estimates (see App. III). Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports.	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic factors.
6	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1991.)	Statistics are published for all Metropolitan Statistical Areas (MSAs) having at least 75% reporting. Figures are listed for central cities of the MSAs if the cities submitted 12 months of data in 1991. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense statistics for 1991. Population statistics represent July 1, 1991, Bureau of the Census provisional estimates. The statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting all 12 months of offense reports plus estimated offense totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Total" represent the above plus the estimated offense totals for agencies submitting less than 3 months of offense reports. The tabular breakdowns are according to UCR definitions (see App. II).	Represents an estimation of the reported crime activity for Index offenses at individual MSA level. Any comparison of UCR statistics should take into consideration demographic factors.
7	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1991)	Offense totals are for all Index offense categories other than aggravated assault. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year.	Represents estimation of national reported crime activity from 1987 through 1991. Aggravated assault is excluded from Table 7, because if money or property is taken in connection with an assault the offense is robbery.
8	All law enforcement agencies submitting complete reports for 12 months in 1991.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The agency populations are 1991 estimates for each agency (see App. III).	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic factors.

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
9	All university/college law enforcement agencies submitting complete reports for 12 months in 1991.	The 1990 student enrollment figures, which are provided by the U. S. Department of Education, are the most recent available. They include full- and part-time students. No adjustments to equate part-time enrollments into full-time equivalents have been made.	Represents reported crime from those individual university/college law enforcement agencies contributing to the UCR Program. These agencies are listed alphabetically by state. Any comparison of these UCR statistics should take into consideration size of enrollment, number of on-campus residents, plus other demographic factors.
10	All law enforcement agencies submitting complete reports for 12 months in 1991.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). Population estimates of suburban counties are as of July 1, 1991.	Represents crime reported to individual law enforcement agencies in suburban counties, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic factors.
11	All law enforcement agencies submitting complete reports for 12 months in 1991.	"Rural Counties" are those outside MSAs and whose jurisdictions are not covered by city police agencies (App. III). Population classifications of rural counties are based on 1991 estimates for individual agencies (see App. III)	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic factors.
12-15	All law enforcement agencies submitting complete reports for at least 6 common months in 1990 and 1991.	The 1991 crime trend statistics are 2-year comparisons based on 1991 reported crime activity. Only common reported months for individual agencies are included in 1991 trend calculations. Populations represent July 1, 1991, estimates for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 15 due to editing procedure and lower submission rate.
16-19	All law enforcement agencies submitting complete reports for 12 months in 1991.	The 1991 crime rates are the ratios of the aggregated 1991 crime volumes and the aggregated 1991 populations of the contributing agencies. Population statistics represent 1991 estimates for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	The forcible rape figures furnished by the Illinois state-level UCR Program were not in accordance with national guidelines. For inclusion in these tables, the Illinois forcible rape figures were estimated by using the national rates for each population group applied to the population by group for Illinois agencies supplying all 12 months of data. Slight decrease in national coverage for Table 19 due to editing procedure and lower submission rate.
20	All law enforcement agencies submitting Supplementary Homicide Report (SHR) data in 1991.	The weapon totals are the aggregate for each murder victim recorded on the SHRs for calendar year 1991.	The SHR is the monthly report form concerning homicides. It details victim and offender characteristics, circumstances, weapons used, etc.
21, 22	All law enforcement agencies submitting complete reports for 12 months in 1991.	The weapon totals are aggregated 1991 totals. Population statistics represent 1991 estimates.	Aggravated assault is excluded from Table 23. For UCR Program purposes, the taking of money or property in connection with an assault is reported as a robbery.
23, 24	All law enforcement agencies submitting complete reports for at least 6 months in 1991.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total of each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1990 and 1991.	
25-28	All law enforcement agencies submitting complete reports for at least 6 months in 1991.	The 1991 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1991. Population statistics represent 1991 estimates. See Appendix III for UCR population breakdowns.	

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
29	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1991).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 31) divided by the percent of total group population reporting (according to 1991 Bureau of the Census provisional estimates; see App. III).	
30, 31	All law enforcement agencies submitting complete reports for 12 months in 1991.	The 1991 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1991 reported arrest statistics and population. The population statistics represent July 1, 1991, estimates. See Appendix III for UCR population classifications/geographical configuration.	
32, 33	All law enforcement agencies submitting complete reports for 12 months in 1982 and 1991.	The arrest trends are the percentage differences between 1982 and 1991 arrest volumes aggregated from all common agencies. Population statistics represent July 1 estimates for 1982 and 1991 (see App. III).	
34, 35	All law enforcement agencies submitting complete reports for 12 months in 1987 and 1991.	The arrest trends are the percentage differences between 1987 and 1991 arrest volumes aggregated from common agencies. Population statistics represent July 1 estimates for 1987 and 1991 (see App. III).	
36, 37	All law enforcement agencies submitting complete reports for 12 months in 1990 and 1991.	The arrest trends are 2-year comparisons between 1990 and 1991 arrest volumes aggregated from common agencies. Population statistics represent decennial Census counts for 1990 and July 1 estimates for 1991 (see App. III).	
38-43	All law enforcement agencies submitting complete reports for 12 months in 1991.		Slight decrease in coverage for Table 43 due to editing procedure and lower submission of race data.
44, 45	All city law enforcement agencies submitting complete reports for 12 months in 1990 and 1991.	The 1991 city arrest trends represent the percentage differences between 1990 and 1991 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
46-49	All city law enforcement agencies submitting complete reports for 12 months in 1990 and 1991.	"City Agencies" are defined as agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Table 49 due to editing procedure and lower submission of race data.
50, 51	All suburban county law enforcement agencies submitting complete reports for 12 months in 1990 and 1991.	The 1991 suburban county arrest trends represent percentage differences between 1990 and 1991 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	
52-55	All suburban county law enforcement agencies submitting complete reports for 12 months in 1991.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	Slight decrease in coverage for Table 55 due to editing procedure and lower submission of race data.
56, 57	All rural county law enforcement agencies submitting complete reports for 12 months in 1990 and 1991.	The 1991 rural county arrest trends represent percentage differences between 1990 and 1991 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside MSAs (App. III).	
58-61	All rural county law enforcement agencies submitting complete reports for 12 months in 1991.	"Rural Counties" are defined as noncity agencies outside MSAs (App. III).	Slight decrease in coverage for Table 61 due to editing procedure and lower submission of race data.
62, 63	All suburban area law enforcement agencies submitting complete reports for 12 months in 1990 and 1991.	The 1991 suburban area arrest trends represent percentage differences between 1990 and 1991 arrest volumes aggregated from contributing agencies. "Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	
64-67	All suburban area law enforcement agencies submitting complete reports for 12 months in 1991.	"Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	Slight decrease in coverage for Table 67 due to editing procedure and lower submission of race data.

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
68	All law enforcement agencies submitting complete reports for 12 months in 1991.	Arrest totals are aggregated for individual agencies within each state. Population figures represent July 1, 1991, estimates (see App. III).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
69	All law enforcement agencies submitting complete reports for 12 months in 1991	Population statistics represent July 1, 1991, estimates for individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

## APPENDIX II

### Offenses in Uniform Crime Reporting

Offenses in Uniform Crime Reporting are divided into two groupings, Part I and Part II. Information on the volume of Part I offenses known to law enforcement, those cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are:

**Criminal homicide.**—a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

**Forcible rape.**—The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used—victim under age of consent) are excluded.

**Robbery.**—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

**Aggravated assault.**—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

**Burglary—breaking or entering.**—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

**Larceny—theft (except motor vehicle theft).**—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, “con” games, forgery, worthless checks, etc., are excluded.

**Motor vehicle theft.**—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

**Arson.**—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

**Other assaults (simple).**—Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

**Forgery and counterfeiting.**—Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

**Fraud.**—Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

**Embezzlement.**—Misappropriation or misapplication of money or property entrusted to one’s care, custody, or control.

**Stolen property; buying, receiving, possessing.**—Buying, receiving, and possessing stolen property, including attempts.

**Vandalism.**—Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

**Weapons; carrying, possessing, etc.**—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

**Prostitution and commercialized vice.**—Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

**Sex offenses (except forcible rape, prostitution, and commercialized vice).**—Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

**Drug abuse violations.**—State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

**Gambling.**—Promoting, permitting, or engaging in illegal gambling.

**Offenses against the family and children.**—Nonsupport, neglect, desertion, or abuse of family and children.

**Driving under the influence.**—Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

**Liquor laws.**—State or local liquor law violations, except “drunkenness” and “driving under the influence.” Federal violations are excluded.

**Drunkenness.**—Offenses relating to drunkenness or intoxication. Excluded is “driving under the influence.”

**Disorderly conduct.**—Breach of the peace.

**Vagrancy.**—Vagabondage, begging, loitering, etc.

**All other offenses.**—All violations of state or local laws, except those listed above and traffic offenses.

**Suspicion.**—No specific offense; suspect released without formal charges being placed.

**Curfew and loitering laws (persons under age 18).**—Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

**Runaways (persons under age 18).**—Limited to juveniles taken into protective custody under provisions of local statutes.

## APPENDIX III

### Uniform Crime Reporting Area Definitions

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographical location or population size. Geographically, the United States is divisible by regions, divisions, and states. Further breakdowns rely on population figures and proximity to metropolitan areas. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of counties but outside cities, while local police report crimes committed within the city limits.

#### Community Types

UCR data are often presented in aggregations representing three types of communities:

**1. Metropolitan Statistical Areas (MSAs)** - Each MSA includes a central city of at least 50,000 people or an urbanized area of at least 50,000. The county containing the central city and other contiguous counties having strong economic and social ties to the central city and county are also included. Counties in an MSA are designated "suburban" for UCR purposes. An MSA may cross state lines. The MSA concept facilitates the analysis and presentation of uniform statistical data on metropolitan areas by establishing reporting units which represent major population centers. Due to changes in the geographic composition of MSAs, no year-to-year comparisons of data for those areas should be attempted.

New England MSAs are comprised of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSA. Some counties, however, have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural area.

MSAs made up approximately 77 percent of the total United States population in 1991. Some presentations in this book refer to "suburban area." A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded. The concept of suburban area is especially important because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

**2. Cities Outside MSAs** - Cities outside of MSAs are mostly incorporated. They comprised 9 percent of the 1991 population of the United States.

**3. Rural Counties Outside MSAs** - Rural counties outside of MSAs are comprised of mostly unincorporated

areas. Law enforcement agencies in rural counties cover areas that are not under the jurisdiction of city police departments. Rural county law enforcement agencies serviced 14 percent of the national population in 1991.

The following is an illustration of the community types:

	MSA	NON-MSA
CITIES	CENTRAL CITIES 50,000 AND OVER	CITIES OUTSIDE
	SUBURBAN CITIES	METROPOLITAN AREAS
COUNTIES (including unincorporated areas)	SUBURBAN COUNTIES	RURAL COUNTIES

#### Population Groups

The population group classifications used by the UCR Program are:

<i>Population Group</i>	<i>Political Label</i>	<i>Population Range</i>
I .....	City	250,000 and over
II .....	City	100,000 to 249,999
III .....	City	50,000 to 99,999
IV .....	City	25,000 to 49,999
V .....	City	10,000 to 24,999
VI .....	City <sup>1</sup>	Less than 10,000
VIII (Rural County) .....	County <sup>2</sup>	N/A
IX (Suburban County) ....	County <sup>2</sup>	N/A

<sup>1</sup> Includes universities and colleges to which no population is attributed.

<sup>2</sup> Includes state police to which no population is attributed.

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. In this edition, the population counts are based on July 1, 1991, Bureau of the Census state estimates. For all jurisdictions within each state, the populations were adjusted based on the 1991 growth rate as supplied by Census. The United States population estimate showed a 1-percent increase in 1991 over the 1990 Census counts.

The following table shows the number of UCR contributing agencies within each population group for 1991.

<i>Population Group</i>	<i>Number of Agencies</i>	<i>Population Covered</i>
I .....	64	45,927,253
II .....	134	19,755,627
III .....	354	24,236,116
IV .....	704	24,422,486
V .....	1,703	26,788,645
VI .....	7,700 <sup>1</sup>	25,225,593
VIII (Rural County) .....	3,748 <sup>2</sup>	34,167,587
IX (Suburban County) ....	1,742 <sup>2</sup>	51,657,693
Total .....	16,149	252,177,000 <sup>3</sup>

<sup>1</sup>Includes universities and colleges to which no population is attributed.

<sup>2</sup>Includes state police to which no population is attributed.

<sup>3</sup>Because of Bureau of the Census rounding, the population covered does not add to total.

## Regions and Divisions

As shown in the accompanying map, the United States is comprised of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

### NORTHEASTERN STATES

New England	Middle Atlantic
Connecticut	New Jersey
Maine	New York
Massachusetts	Pennsylvania
New Hampshire	
Rhode Island	
Vermont	

### MIDWESTERN STATES

East North Central	West North Central
Illinois	Iowa
Indiana	Kansas
Michigan	Minnesota
Ohio	Missouri
Wisconsin	Nebraska
	North Dakota
	South Dakota

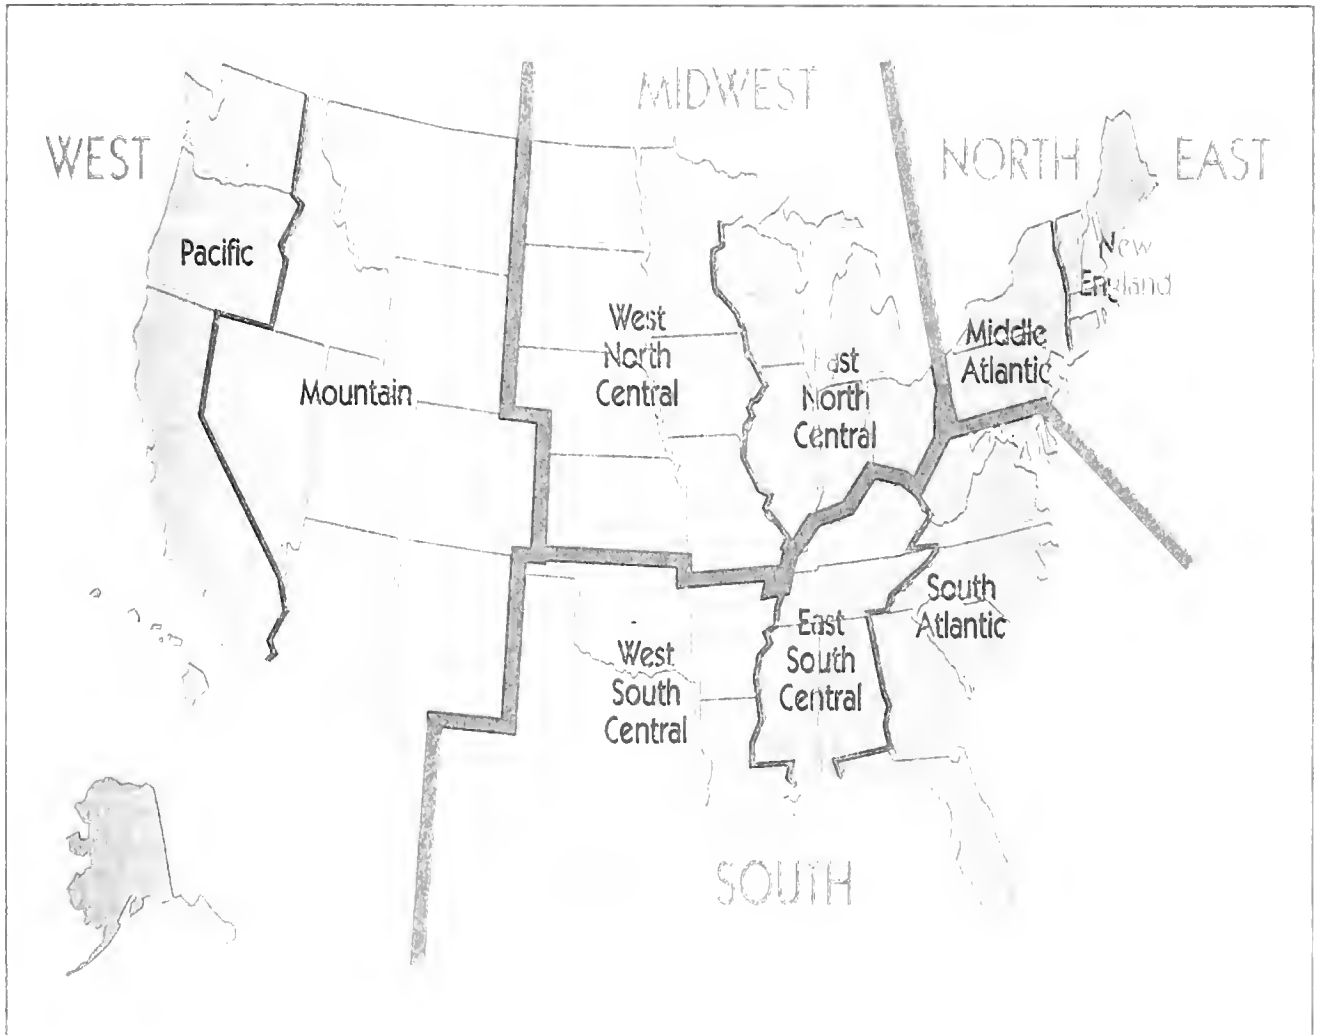

### SOUTHERN STATES

South Atlantic	East South Central
Delaware	Alabama
District of Columbia	Kentucky
Florida	Mississippi
Georgia	Tennessee
Maryland	
North Carolina	West South Central
South Carolina	Arkansas
Virginia	Louisiana
West Virginia	Oklahoma
	Texas

### WESTERN STATES

Mountain	Pacific
Arizona	Alaska
Colorado	California
Idaho	Hawaii
Montana	Oregon
Nevada	Washington
New Mexico	
Utah	
Wyoming	

# REGIONS AND DIVISIONS OF THE UNITED STATES

## APPENDIX IV

### The Nation's Two Crime Measures

The U. S. Department of Justice administers two statistical programs to measure the magnitude, nature, and impact of crime in the United States: the Uniform Crime Reporting (UCR) Program and the National Crime Victimization Survey (NCVS). Because of differences in methodology and crime coverage, the results from the two programs are not strictly comparable nor consistent. By complementing each other's findings, the two programs enhance our understanding of the Nation's crime problem.

#### Uniform Crime Reports

The FBI's UCR Program, which began in 1929, collects information on the following crimes reported to law enforcement authorities: homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

The UCR data are compiled from monthly law enforcement reports made directly to the FBI or to centralized state agencies that then report to the FBI. Each report submitted to the UCR Program is examined thoroughly for reasonableness, accuracy, and deviations that may indicate errors. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in a jurisdiction's boundaries. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies.

Law enforcement agencies active in the UCR Program represent approximately 241 million United States inhabitants—96% of the total U. S. population.<sup>1</sup>

The UCR Program provides crime counts for the Nation as a whole, as well as for regions, states, counties, cities, and towns. This permits studies among neighboring jurisdictions and among those with similar populations and other common characteristics.

UCR findings for each calendar year are published initially in a preliminary release in the spring followed by a detailed annual report, *Crime in the United States*, issued in the summer following the calendar year. In addition to information on crime counts and trends, this report includes detailed data on crimes cleared, persons arrested (age, sex, race) for a wide range of crimes, law enforcement personnel (including the number of sworn officers killed or assaulted), and the characteristics of homicides (including age, sex, and race of victims, victim-offender relationships, weapons used, and circumstances surrounding the homicides). Other special reports are also available from the UCR Program.

Following a 5-year redesign effort, the UCR Program is currently converting to a more comprehensive and detailed

reporting system, called the National Incident-Based Reporting System (NIBRS). NIBRS will provide detailed information about each criminal incident in 22 broad categories of offenses.

#### National Crime Victimization Survey

The Bureau of Justice Statistics' (BJS) NCVS, which began in 1973, collects detailed information on the frequency and nature of the crimes of rape, personal robbery, aggravated and simple assault, household burglary, personal and household theft, and motor vehicle theft. It does not measure homicide or commercial crimes (such as burglaries of stores).

Interviews are conducted by U. S. Census Bureau personnel with all household members at least 12 years old in a nationally representative sample of approximately 49,000 households (about 101,000 persons). Households stay in the sample for 3 years and are interviewed at 6-month intervals. New households rotate into the sample on an ongoing basis.

The NCVS collects information on crimes suffered by individuals and households, whether or not those crimes were reported to law enforcement. It estimates the proportion of each crime type that was reported to law enforcement, and it details the reasons given by victims for reporting or not reporting.

The survey provides information about victims (age, sex, race, ethnicity, marital status, income, and educational level), their offenders (sex, race, approximate age, and victim-offender relationship), and the crimes (time and place of occurrence, use of weapons, nature of injury, and economic consequences). Questions also cover the experiences of victims with the criminal justice system, details on self-protective measures used by victims, and possible substance abuse by offenders. Periodically, supplements are added to the survey to obtain detailed information on special topics such as school crime.

Findings from the NCVS for each calendar year are published in a press release the following April (preliminary data), in a BJS Bulletin in the fall presenting summary final data, and in a detailed report the following June covering all NCVS variables. Each year BJS staff develop Special and Technical Reports on specific crime topics.

#### Comparing UCR and NCVS

As the previous description illustrates, there are significant differences between the two programs. The NCVS, for example, includes crimes both reported and not reported to law enforcement, but it excludes homicide, arson, commercial crimes, and crimes against children under age

<sup>1</sup> Population coverage is according to 1991 figures.

12 (all of which are included in the UCR Program). The UCR captures crimes reported to law enforcement, but it excludes simple assaults from the Crime Index. Moreover, even when the same crimes are included in the UCR and NCVS, the definitions vary.

Another difference is the way that rate measures are presented for crimes such as burglary, household theft, and motor vehicle theft in the two programs. The UCR rates for these crimes are largely per-capita (number of crimes per 100,000 persons), whereas the NCVS rates for these crimes are per-household (number of crimes per 1,000 households). Because the number of households may not grow at the same rate each year as the total population, trend data for rates of household crimes measured by the two programs may not be comparable.

In any large-scale data collection program, there are many possible sources of error. For example, in the UCR Program, a police officer may classify a crime incorrectly, and in the NCVS a Census Bureau interviewer may incorrectly record the responses given by a crime victim. Crime data may also be affected by how the victim perceives and recalls the event. Moreover, as data are compiled and processed, clerical errors may be introduced at any stage. Both the UCR and NCVS programs employ extensive accuracy checks at various stages in the data collection process to minimize errors.

As noted above, the NCVS is based on an extensive, scientifically selected sample of American households. Thus, every crime measure presented in NCVS reports is an estimate for the Nation based on results obtained from the sample. Estimates based on a sample have sampling variation, or a margin of error (which defines a confidence interval) associated with each estimate. This means that if another sample is drawn, the resulting estimate would be somewhat different from the original one. If the survey were repeated many times with different samples, the resulting estimates would cluster around the actual measure for the entire population. Rigorous statistical methods

are used for calculating the magnitude of the sampling variation associated with the NCVS estimates. Trend data in NCVS reports are described as genuine year-to-year changes only if there is at least a 90% certainty that the measured changes are not the result of sampling variation. The UCR data are based on the actual count of offenses reported by law enforcement jurisdictions. In some circumstances UCR data are estimated for nonparticipating jurisdictions or those reporting partial data.

Some differences in data from the two programs may result from the fact that NCVS estimates are subject to sampling variation. Apparent discrepancies between statistics from the two programs can usually be resolved by comparing NCVS sampling variations (confidence intervals) with UCR statistics. Year-to-year changes in individual crime categories reported by the UCR usually fall within the confidence intervals of the NCVS estimates, indicating no statistically significant differences between the output of the two programs. Even should the UCR changes fall outside the intervals, incompatibility of statistics should not be assumed. To illustrate, when differences between UCR and NCVS occur, there is a 10% chance they are due to sampling variation because of the 90% confidence level established by NCVS. It should also be noted that definitional and procedural differences between the UCR and NCVS programs can account for apparent discrepancies in data output.

As has been discussed throughout, the results of UCR and NCVS are not strictly comparable for a variety of reasons. Data users, however, possessing the basic understanding of each program's objectives, methodology, and coverage, can use the output from each in a complementary manner to better assess crime occurrence, losses, law enforcement involvement, arrestee descriptive information, and victimization data. By properly utilizing both programs in tandem, the crime issues in this country can be viewed in a much broader, more complete scope.

## APPENDIX V

### Directory of Uniform Crime Reporting Programs
